STENVAAG DESIGN Skorpion model

Size information is available at www.ahg-anschuetz.de in the download area!

STENVAAG DESIGN

Based on the Stenvaag-Design jackets and trousers which have been well-known and successful in use for years, the Stenvaag Skorpion collection has been developed by consistent enhancements in cooperation with the national marksman, Harald Stenvaag.

The experience and results of countless World Championships and Olympic Games are now brought to bear in this new Stenvaag collection.

1 Shooting jacket STENVAAG-DESIGN SKORPION

High quality leather-canvas mixture with TOP GRIP padding, "Made in Germany".

- The offset sleeve on the supporting arm guarantees a precisely repeatable, distortion-free position for all disciplines.
- A multitude of possible height and angle adjustments for attaching the target sling optimise the transfer of force from the sling to the rifle in both the prone and the kneeling position.
- Asymmetrically inserted suede shoulder yokes reduce unpleasant wrinkling in the neck area in the prone position.
- Adjustable shoulder straps enable controlled fold formation for optimum butt plate fit in the shoulder.
- Sensibly fitted stretch inserts give the shooting jacket the required comfort with perfect stabilisation of the shooting position.
- The leather stretch material on the right hand upper arm prevents stresses that can arise in this area from being transmitted to the back area. The shooter can thus stand uncocked in the shooting position.
- Coloured piping on the back gives the back panel a sporty appearance.

Material:
Outer material: 58% cotton, 42% leather
Lining: 100% cotton

Item No.: 167

Also available tailor-made and in a left-handed version!

1

Side darts guarantee better fit at the waist in the standing position.

Stretch insert on the left lower arm prevents the jacket from touching the stock when in the prone position. Additionally stabilises the connection between jacket and glove.

SHOOTING TROUSERS

2

2 SPECIAL-COLOR shooting trousers

To achieve the most important functions of shooting trousers, the trousers have been designed as follows:

- The specially tailored yoke ensures an optimum fit in the spinal area.
- Two long 2-way zip fasteners which can be opened in the various positions from above or below.
- A hook fastener on the waistband and a Velcro fastener on the right hand leg allow individual adjustments of the trousers and can compensate for small variations in the weight of the shooter.
- The stretch material at the end of the Velcro fastener prevents the material from pressing on the thigh and waist areas.
- The stretch material in the crotch and on the thighs enables a wider foot posture in the kneeling position.
- Top Grip pad on the knees and a separate seat pad avoid pain when in kneeling position.

Material:
Outer material: 100% cotton
Lining: 100% cotton

Colours:
black-blue

Item No.: 14116

3

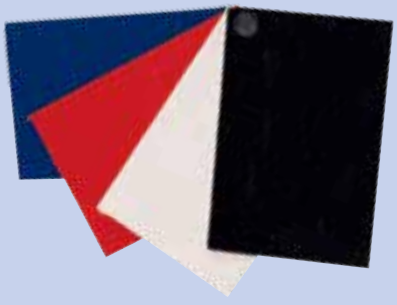
3 Shooting trousers STENVAAG-DESIGN

The Stenvaag trousers have two long 2-way zippers which can be opened from top or bottom in different positions.

- The hook fastener on the waistband and the Velcro fastener on the right hand trouser leg allow individual adjustments e.g. to compensate for small variations in the weight of the shooter.
- Top Grip pad on the knees and a separate seat pad avoid pain when in kneeling position.

Material of Model 1:
Outer material: 100% cotton
Lining: 100% cotton

Item No.: 139



Made in GERMANY

Also available tailor-made and in a left-handed version!

FUSION

ahg Shooting Jackets

When making our shooting sports jackets, we combine our 30 years of experience with the special requirements of our shooters.

- Our clothing is manufactured with particular regard to the ISSF regulations.
- All the jackets in our range are also available made-to-measure (size chart).
- All standard sizes – also available for left-handed shooters, of course!
- All jackets have a canvas lining.

1 Shooting jacket Stenvaag Skorpion FUSION

The Stenvaag Skorpion FUSION shooting jacket is made from a proven leather-canvas material mixture in the front part as well as a dimensionally stable but flexible elastomer on a cotton base in the back part of the jacket. New button arrangement provides better fit in kneeling and prone positions.

A Perfect fit due to leather trim in the shoulder area.

B Stretch material on the lower arm:
- Prevents contact of the holding hand with the rifle stock in the prone position.
- Perfect fit of jacket and glove (no more pinching).

C Perfect cut at the shoulders, hip and back:
- Superb fit.
- Outstanding stability due to dimensionally stable elastomer back parts.
- Designed to fit at the waist due to side darts.

D Soft leather facing.

Individual colour combinations (see measurement and colour sheet). Highest quality materials guarantee optimum hold.

Material:
Outer material: 50% rubber, 34% leather, 15% cotton
Lining: 100% cotton-canvas

Colours:
Elastomer material only available in white or blue.

Item No.: 168

2 Shooting trousers FUSION

The hips and seat of FUSION shooting trousers are made of the new elastomer material, the trouser legs of dimensionally stable, flexible canvas material.

- Top Grip pad on the knees and a separate seat pad avoid pain when in kneeling position

Material:
Outer material: 60% cotton, 40% rubber
Lining: 100% cotton-canvas

Colours:
Elastomer material only available in white or blue.

Item No.: 143

Made in GERMANY

Elastomer FUSION

Also available tailor-made and in a left-handed version!

3

3 EVOTOP shooting jacket

The EVOTOP shooting jacket is made from top quality and unique material:

- Double Evotex material in combination with parts of soft perforated leather; air system – adapts optimally to the shooter's body.
- Maximum stiffness, while still conforming to ISSF rules.
- The adjustment of the sling offers numerous variations.
- The sling mount can be adjusted.
- Metal clips in the back of the jacket for fixing the start number.
- Supporting parts of the elbows and shoulders are made of Top Grip.
- Elasticated material around the elbow reduces wrinkles and allows the arm to bend easily in the standing position.
- The right sleeve is made of soft leather at the back.
- This model of shooting jacket is available for both right and left-handed shooters.
- Buttons are made of dural and are very secure thanks to the screw technology.
- Available in many colour combinations.

Material:
60% polyester, 17% leather, 15% cotton, 5% Top Grip, 3% elastane

Item No.: 95100

4

4 EVOTOP shooting trousers

- Combination of finest leather and EVOTEX Material.
- The Velcro fasteners on the waistband and on the right trouser leg allow individual adjustments, e.g. to compensate for small fluctuations in the weight of the shooter.
- The inside of the waistband is made of a cord fabric and prevents the trousers from slipping.
- The trousers have two long 2-way zippers which can be opened from top or bottom in different positions.
- The left front side is made from soft leather to provide comfort without pressure marks when in the kneeling position.
- A leather insert in the crotch permits wider foot positioning when in the kneeling position.
- The trousers leg cuffs are made from leather to avoid balance problems when they sit on the boots.
- Top Grip pad on the knees and a separate seat pad avoid pain when in kneeling position

Material:
75% polyester, 12% leather, 8% canvas, 5% Top Grip

Item No.: 95101

Video info for tailor-made:
www.youtube.com/ahgAnschuetz

EVOMIX and X-DRY

1 Shooting jacket EVOMIX

The difference to the EVOTOP jacket is, that the sleeve is made of canvas, the padding on the arm is made of anti slip rubber and the jacket has in some areas a simple cut construction to offer also a more favourable alternative.

Material:
40% polyester, 35% cotton, 15% leather, 5% elastan, 5% rubber

Item No.: 95120

2 Shooting trousers EVOMIX

- Processing Leather, canvas and EVOTEX material
- Velcro fastening on the waistband and right trouser leg allow individual adjustment
- Inside of the waistband is made from cord fabric and thus avoids shifting of the pants
- Two long 2-way-zippers allow individual adjustment from top or bottom when shooting in different positions
- Left front side is made from soft leather to provide comfort without pressure marks when in kneeling position
- Leather part in the stride grants wider foot positioning when in kneeling position
- Grip padding avoid pressure marks when in kneeling position

Material:
50% canvas, 40% polyester, 5% leather, 5% rubber

Item No.: 95121

3 X-DRY VENTILATION shooting jacket

- Suede leather on the front left part as well as Top Grip padding on the supporting arm improves the grip when in the standing position.
- X-DRY Ventilation material in the back improves air circulation and avoids heat accumulation inside the jacket. The inner lining on these parts is perforated in order to optimise temperature compensation.
- Soft leather with air holes as well as 2 shoulder straps reduce material bulges when prone shooting and guarantee best possible fit of the butt plate in the shoulder.
- The sling attachment has numerous holes and can thus be adjusted individually in height and sideways.
- Individual fitting of the jacket by means of flat aluminum buttons with screws.
- Stretch material in the left sleeve head provides more flexibility for the supporting arm.
- The inner lining is made from perforated material for better air balance.

Material:
70% canvas, 16% leather, 6% PAD, 5% PVC, 3% PES

Item No.: 176

4 X-DRY VENTILATION shooting trousers

- The Velcro fasteners on the waistband and on the right leg allow individual adjustments e.g. to compensate for small fluctuations in the weight of the shooter.
- The inside of the waistband is made of a cord fabric and prevents the trousers from slipping.
- The trousers have two long 2-way zippers which can be opened from top or bottom in different positions.
- The left front side is made from soft leather to provide comfort without pressure marks when in the kneeling position.
- A leather insert in the stride permits wider foot positioning when in the kneeling position.
- X-DRY Ventilation material on the inside of the upper leg and on the right thigh improves air circulation and prevents heat accumulation in the trousers. The inner lining on these parts is perforated in order to optimise temperature compensation.
- The trouser leg cuffs are made from leather to avoid balance problems when they sit on the boots.
- Top Grip pad on the knees and a separate seat pad avoid pain when in kneeling position.

Also available tailor-made and in a left-handed version!

1

2

3

4

Material:
82% canvas, 8% leather, 5% PAD, 5% PVC
Item No.: 148

5 Shooting jacket ECONOMY

A high quality double canvas shooting jacket at an affordable price!

- The left side has a suede upper piece for even better adhesion to the non-slip rubber facing on the sleeve in the standing position.
- Two shoulder straps on the back remove the material bulge when shooting in the prone position.
- Outstanding fit and stability due to the tailored cut, particularly at the shoulders, hips and spine.
- Individual fitting of the jacket due to aluminum buttons with screw.
- New target sling fixing.

Material:
Outer material: 85% cotton, 15% leather
Lining: 100% cotton

Sizes:
Available in standard sizes:
44 – 60 (men), 36 – 48 (women).
Item No.: 174

5 Shooting jacket model MATCH

This shooting jacket offers pleasant wearing comfort due to a material mix of firm canvas, soft cowhide as well as sturdy textile leather (Amara).
High quality, slip resistant Top Grip pads were used on the elbow and shoulder which provide best grip for the supporting arm in standing position.

- Soft, perforated, breathable leather on the sleeve and neck area provides best climate in the shoulder area.
- Sling attachment offers many adjusting possibilities.
- Stretch material in arm pit and elbow area allow allround flexibility.
- Two slings on the back help eliminate access material when in prone position.
- Five adjustable screw buttons for individual fitting to the body.

Material:
70% cotton, 20% cowhide, 10% polyester (Amara)
Inner lining: 100% cotton
Padding:100% rubber
Colour: grey/white/red

Item No.: 164

6 Shooting trousers model MATCH

Shooting pants Match has two long 2-way-zippers which can be opened from top or bottom for individually different positions.

- Velcro fastener on the waist band and the right front pants leg; this allows individual adjustment.
- Top Grip pad on the knees and a separate seat pad avoid pain when in kneeling position
- Sportive looks by perforated leather on both sides and the waist band

Material:
80% leather, 20% cotton
Inner lining: 100% cotton
Colour: grey/white/red

Item No.: 146

SHOOTING UNDERWEAR

1 Underwear COLD WINNER™

- Versatile, patented high-tech fabric.
- Combination of three different materials.
- Whether in the cold at –27° C or heat at +30° C, your temperature remains constant.
- Excess sweat absorbed by skin contact is passed immediately to the outside, where it evaporates into the air. The body remains warm and dry.

Tests carried out in Canada and Europe under both extreme and everyday conditions (at temperatures between +25° C and –22° C) have confirmed the advantages of this high-tech underwear.

The COLDWINNER™ underwear must be worn close to the body, directly against the skin, to achieve the maximum benefit. It can be worn all year round according to climatic conditions and temperature variations.

Thanks to its high-tech structure, COLD WINNER™ is the heat-regulating underwear suitable for all conditions.

Material:
48.15% polyester, 48.15% thermolite, 3.7% lycra

Sizes:
XXS, XS, S, M, L, XL, XXL

Item No.: 154 (Undershirt, long sleeves)

Item No.: 155 (Underpants, long)

2 SHOOTING UNDERWEAR

Functional and thermal underwear made from Tactel aquator. The ideal underclothing for sport and leisure.

- Unique fabric combination with effective moisture management.
- Maximum wearing comfort.
- Unique, two-layer material system.
- The inner Tactel layer conducts body moisture away from the skin into the outer cotton layer, where it evaporates.
- With high collar and zip fastener.
- Moisture-regulating.
- Temperature-regulating.
- Breathable.
- Kind to the skin.
- Dimensionally stable and elastic.
- Easy care.

Material:
65% cotton, 35% polyamide

Sizes:
XXS, XS, S, M, L, XL, XXL

Item No.: 152 (Undershirt, long sleeves)

Item No.: 153 (Underpants, long)

3 Shooting vest COLD WINNER™

Same features as the Cold Winner long-sleeved undershirt, Item 154, except:

- A second layer of material has been incorporated into the upper body area of the vest (2,2 mm instead of 1,1 mm). The volume of the vest increases as a result of the extra material, making it more comfortable to wear.
- 2-way zip fastener for the kneeling position.
- Heat-regulating underwear.

Material:
48.15% polyester, 48.15% thermolite, 3.7% lycra

Sizes:
XXS, XS, S, M, L, XL, XXL

Item No.: 156

SHOOTING VESTS

SHOOTING VESTS in up-to-date colours

It is not only the shooting jacket which is important when shooting, but also the underwear.
Ahg shooting vests offer the following benefits, which you will feel as soon as you put them on.

- Crease-free fit in the shoulder and elbow areas.
- No distracting seams in the shoulder area.
- Padded elbows especially for shooting in the prone position.
- 2-way zip fastener can be opened from the bottom when in the kneeling position.
- Air holes in the back for temperature compensation.

Material:
50% cotton, 50% polyacrylics

Sizes:
XXS, XS, S, M, L, XL, XXL

4 SHOOTING VEST

Colours: blue/black
Item No.: 194

5 SHOOTING VEST

7 BIKE-SHIRT

- Blue with zip fastener.
- 3 open pockets at the back.

Material: 100% polyester
Sizes: XS, S, M, L, XL
Item No.: 3201

F-Lite functional underwear

ALL SEASON Megalight 200

The F-Lite First-Layer-System in 3-D knitting technology surrounds the body without creating a feeling of being cramped. It perfects the body's function like a modern air-conditioner: cooling in summer – warming in winter.

The well-thought-out moisture management provides the possibility to keep the body temperature at a normal level for best possible performance even under utmost stress.

The F-Lite seamless construction largely avoids seams as the material is knitted endlessly; only sleeves e.g. are being sewed on with flat seams, virtually cannot be felt. The elasticity of the fibre is preserved, the fit is perfect and wearing it feels extremely comfortable – just like a second skin.

The F-Lite underwear has to be worn directly on the skin (first layer) in order to fullfill its intended function to absorb moisture from the skin, buffer it within the 3-D-construction and finally release it to the outside. The shooting jacket can be worn directly on the F-Lite underwear. Shooters who prefer more volume can put on a shooting vest additionally, without exceeding the limits of regulations.

The F-Lite KEEPS FRESH Technology operates antibacterial and odorless by means of high quality metallic salts and thus prevents unpleasant odors. Thanks to its double layered honeycomb design the F-Lite is most comfortable to wear. The two layers speed up transportation of moisture from inside to outside by quickly absorbing dampness on the skin and moving it away.

Material:
85% polyamide, 15% polyester
Tissue weight: 200 g / m²

1 F-Lite LONGARM

Item No.: 157 (longarm man, M – XXL)
Item No.: 157D (longarm woman, S – XL)

3 Shooting boots
STENVAAG STRONG

- The shoe complies to the new ISSF rule 2013.

(A) Comfortable, tight-fitting lacing prevents pressure pain in the kneeling position and adjusts immediately to any shape of foot.

(B) Thermoplastic material is now completely integrated into the heel, outer and inner foot areas to provide improved side stability.

(C) Newly revised inner shoe for improved standing comfort.

(1) Well padded tongues made of perforated climatic lining prevent pressure pain and guarantee outstanding air circulation.

(2) Perforations in the exterior upper plus porous padding foam allow air circulation to the base.

(3) The butt plate of soft, elastic rubber has an extremely strong grip and improves the hold when in the kneeling position.

(4) Velcro fastener for fine adjustment of the boot.

(5) A new fixing system provides pressure-free fixing of the foot without constricting the circulation; the feet do not "go to sleep". This system is combined into an integral unit with the boot-leg lacing. The secondary clamping hooks permit two-zone lacing.
The secondary low holding hooks, combined with the Digafix system, also inprove the fit at the heel.
This lacing system permits any fastening variant.

(6) The heel cap is made of extremely stiff thermoplastic material.

(7) Grip Control optimises the hold when in the kneeling position.

Material:
Upper material: leather
Sole: rubber

Sizes:
35 – 49 (2½ – 13)

Item No.: 135

Stenvaag DESIGN

SHOOTING BOOTS

1 Shooting boots - COMPETITION

Designed by shooters, for shooters.

- The entire tongue is a combination of 3-D mesh material which provides better air circulation in the boot (no build-up of heat) and reticulated foam padding, which improves the wearing comfort. This combination makes all the difference.
- The Velcro integrated into the tongue allows it to be individually adjusted to the instep and fixed in position.
- The tongue, which extends well forward, is designed so the base can be individually and very snugly fixed over the entire length. Individual adjustment is thus easy to achieve.
- The special last shape is designed so that the front of the sole, and not the front of the boot, is in contact with the ground when shooting in the kneeling position. A stable position can be achieved in this way.
- The rear edge of the sole is slanted slightly to improve the seating in the kneeling position.
- Velcro fastener facilitates fine adjustment of the boot.
- The two reinforcing ribs on the side strengthen the lateral hold and the stability of the foot in the boot.
- Decorative stitching on the outside gives the boot a sporty appearance.
- Due to its construction, the Ergofit inner sole has very good stabilising properties.
- The shoe complies to the new ISSF rule 2013.

Material:
Upper material: leather
Sole: rubber

Sizes:
35 – 51 (3 – 14½)

Item No.: 137

2 Sports shoes - ALLROUND

This newly designed shoe with a sporty look is, as the name Allround suggests, a shoe that can be used for various disciplines such as running target, trap, skeet, pistol and also rifle shooting.

- Well padded tongues distribute all kinds of pressure and prevent pressure pains.
- Sturdy shoe.
- Comfortable lacing.
- Beautiful finish inside and outside gives the shoes a sporty look.
- The orthopaedic insole prevents rapid tiring of the foot during competitions.
- The shoe complies to the new ISSF rule 2013.

Material:
Upper material: leather
Sole: rubber

Sizes:
From 36 – 48 (3 – 12)

Item No.: 134

3 Shooting boots - EASY

- The budget-priced shooting boot with customary Meindl quality.
- Orthopaedic insole.
- Optimum workmanship for stability.
- Stable, straight sole for safe shooting position.
- The shoe complies to the new ISSF rule 2013.

Material:
Upper material: leather
Sole: rubber

Sizes:
37 – 47 (3½ to 12)

Item No.: 132

4 SHOE TREE

The shoe tree for shooting boots will prolong the life of your boots and ensures constant flat soles for many years.

For all common shooting boot sizes from 36 – 50.

Item No.: 136

5 Meindl Special Climate Socks

Anatomically knitted with Coolmax for cool, dry and comfortable wear.

Colour: black

Material:
68 % cool Max, 26% cotton, 4% polyamide, 2% elastan

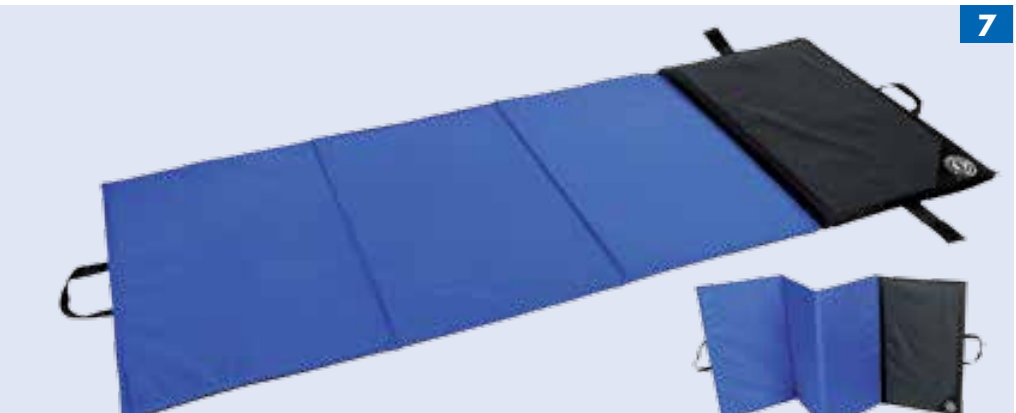
Sizes:
S = 36 – 39, M = 40 – 43, L = 44 – 47

Item No.: 133-1

6 LACES

- For shooting boots, 1 set
- Length: 180 cm

Item No.: 133-2



7 PRONE MAT

The ahg prone mat consists of 4 padded segments which can be easily folded up and fastened with Velcro fasteners.

- Carrying straps facilitate safe transport.
- An extra rubber layer in the elbow area prevents sliding when in the shooting position.
- Detachable elbow mat.

Dimensions: 200 x 80 cm,

Weight: 2 kg

Item No.: 385

SHOOTING GLOVES

1 THERMO-STAR

5-finger glove. The latest generation of shooting gloves from ahg-Anschütz offers you the following advantages which will pay off noticeably during competition.

- With net material at the back of the hand and on the palm and with air ventilation holes at the fingers, an optimum temperature circulation is achieved to avoid excessive heat in the glove.
- Due to the use of latest high-tech materials, the back of the hand is reinforced, additionally giving support to the wrist.
- Damping material extends from the back of the hand to the palm, so that the pressure of the handstop is optimally distributed over the hand when shooting in the prone position.
- TOP GRIP padding prevents the firearm from slipping.

Material:
Upper material: 60% rubber, 20% polyurethane, 8% polyamide, 6% leather, 6% rubber tape
Inner lining: 34% wool, 33% viscose, 33% polyacryl
Padding: Top Grip

Sizes: XS, S, M, L, XL
For right-handed shooters only

Item No.: 127

1

2 TOP GRIP COLOR

A top quality 5-finger glove in fine, high strength, supple leather, with stretch band.

- Optimised comfortable cut with maximum padding conforming to ISSF & DSB rules.
- Coating consists of strongly adhering TOP GRIP material.
- Good temperature equalisation due to the lattice weave at the side on the back of the hand.

Material:
Upper material: 100% leather
Inner lining: 34% wool, 33% viscose, 33% polyacryl
Padding: Top Grip

Sizes: XXS, XS, S, M, L, XL

For right-handed shooters:
Item No.: 101C

For left-handed shooters:
Item No.: 101C-L

2

3 ahg-Match long

5-finger-glove closed.

- black anti-slide coating.
- Stretch band on the wrist.

Material:
98 % Amara, 2% leather
Inner lining: 34% wool, 33% viscose and 33% polyacryl
Padding: India rubber

Sizes: XS, S, M, L, XL
For right-handed shooters only

Item No.: 112

3

4 ahg-Match

Open 5-finger-glove.

- black anti-slide coating.
- Stretch band on the wrist.

Material:
Obermaterial: 98 % Amara, 2% leather
Innenfutter: 34% wool, 33% viscose and 33% polyacryl
Padding: India rubber

Sizes: XS, S, M, L, XL, XXL
For right-handed shooters only

Item No.: 114

4

5

5 SHORT BLACK

Open 5-finger glove.

- Cut along the knuckles for easy bending of the fingers.
- Firm leather material improves support.
- Open fingers allow better temperature regulation and facilitate loading the rifle with the left hand (thumb and index finger).

Material:
Upper material: 60% leather, 40% synthetic leather
Inner lining: 34% wool, 33% viscose, 33% polyacryl
Padding: natural rubber

Sizes: XS, S, M, L, XL

For right-handed shooters: **Item No.: 115**
For left-handed shooters: **Item No.: 115-L**

6

6 COMFORT SHORT

Open 5-finger glove in a combination of leather and VELON high tech breathable fabric. The use of this new VELON fabric gives the glove the following advantages:

- The glove remains soft and pliable, even when cold, and is comfortable to wear.
- Water-repellent and moisture-permeable.
- Top Grip padding prevents the rifle from slipping.
- Short stock and index finger permit problem-free loading of the rifle.

Material:
Upper material: 80% velon-cotton/PES fused with PUR, 20% leather.
Inner lining: 34% wool, 33% viscose, 33% polyacryl
Padding: Top Grip

Sizes: XS, S, M, L, XL

For right-handed shooters: **Item No.: 116**
For left-handed shooters: **Item No.: 116-L**

7

7 SHORT

Open 5-finger glove.

- Cut along the knuckles for easy bending of the fingers.
- Sturdy leather material, as well as the overall non-slip coating on the back of the hand improve the support in the shooting position.
- Open fingers allow better temperature regulation and facilitate loading the rifle with the left hand (thumb and index finger).

Material:
Upper material: 60% leather, 40% synthetic leather
Inner lining: 34% wool, 33% viscose, 33% polyacryl
Padding: natural rubber

Sizes: XS, S, M, L, XL
For right-handed shooters only.

Item No.: 123

8

8 STYLE

5-finger glove.

- Cut along the knuckles for easy bending of the fingers.
- Good temperature equalisation due to the lattice weave at the side of the wrist.
- Stretch band at the wrist.
- GRIP padding in grey/white.

Colour: carbon.

Material:
Upper material: 60% leather, 40% synthetic leather
Inner lining: 34% wool, 33% viscose, 33% polyacryl
Padding: natural rubber

Sizes: XS, S, M, L, XL
For right-handed shooters only.

Item No.: 125

ahg shooting gloves in different colours and materials. As individual as your personality. The right model for every taste. But all models have one thing in common: Quality.

- Optimum fit.
- Comfortable cut.
- Non-slip padding, GRIP or TOP GRIP.
- Manufactured according to DSB and ISSF rules.

SHOOTING GLOVES

1 CONTACT

This specially developed shooting glove offers the supporting hand more direct contact with the rifle, much freedom of movement and maximum padding. Thumb and forefinger are open to allow comfortable loading of the gun. The processed special leather with breathable fleece material facilitates heat transfer and reduces perspiration from the hand.
The newly developed hard-wearing non-slip padding on the inside and outside surfaces of the glove adapt to the hand and hold the rifle in the shooting position without slipping. If required, the glove can be washed at 30 °C.

Material:
50% polaire polyester, 46% leather, 4% rubber
Padding: 60% polyamide, 40% polyurethane

Sizes: XS, S, M, L, XL, XXL
For right-handed shooters only.

Item No.: 118

2 TRIGGER

A newly designed glove for the trigger hand. A membrane inserted in the processed double fleece material maintains your trigger hand at a pleasant, constant temperature.

The end of the trigger finger is open to provide direct contact with the trigger.
The special leather used on the palm of the glove moulds itself to the pistol grip of the gun and thus ensures non-slip contact (grip).

If required, the glove can be washed at 30 °C.

Material:
50% polaire polyester, 46% leather, 4% rubber

Sizes: XS, S, M, L, XL, XXL
For right-handed shooters only.

Item No.: 119

3 BENCH REST

A specially developed bench rest glove for the non-trigger hand.
The advantages of this bench rest glove are

- when the hand rests on the barrel unit, direct contact with sweat from the hand is prevented.
- the use of thin and very slip-resistant structural leather provides optimum grip and contact with the rifle.
- even on cold days the rifle can be held comfortably from above or below.

If required, the glove can be washed at 30 °C.

Material:
50% polaire polyester, 46% leather, 4% rubber

Sizes: XS, S, M, L, XL, XXL
For right-handed shooters only.

Item No.: 120

4 TRIGGER SHORT

The trigger glove increases the grip between stock and hand. An even temperature balance is achieved by the use of mesh material and wind stopper fleece on the back of the hand.
The palm of the glove is made from soft and cuddly Alcantex material with silicone burling to increase the grip and still preserve the feeling on the stock.

Material:
50% polyester, 25% polyamide, 25% polyurethane

Sizes: XS, S, M, L, XL
For right-handed shooters only.

Item No.: 121

Padding: natural rubber

For right-handed shooters:	For left-handed shooters:
Item No.: 113	**Item No.: 113-L**

SHOOTING CAPS

1 SHOOTING CAP

- The long peak on the ahg shooting cap prevents distracting light from above from having an adverse effect on the aiming process.
- A velcro fastener permits easy adjustment to any head size.
- The side sections made of netting material increase the air flow and thus provide temperature regulation.
- The cap can be made to conform to DSB and ISSF regulations simply by folding up the side flaps.
- When you are shooting according to DSB or ISSF regulations, you must cut the side flap at the seam to suit.
- If you are shooting according to the rules of another association which does not regulate the use of side flaps, they can also remain folded down.

Material:
60% cotton, 40% polyester

Colour:
Blue-black
Item No.: 325 Colour

1

2 NEOPRENE CAP DE LUXE

The sun visor on the ahg Neoprene Cap "de Luxe" can be adjusted individually to any desired position by means of a new, patented pivot fixing system.

With this new fixing system, we guarantee that the shooter will be able to set an optimum position for his sun visor for the particular changes in lighting conditions when aiming.

The inside of the ahg-neoprene cap is covered with a towelling material which absorbs sweat and is comfortable to wear.

Material:
Outside: 100% polyurethane
Lining: 100% cotton

Item No.: 302 (peak length 10 cm, grey)
Item No.: 302-S (peak length 9 cm, grey)
Item No.: 302-B (peak length 10 cm, blue)

2

Item No.: 302-S

Item No.: 302-B

3 NEOPRENE CAP

- Protection from scattered light.
- Flexible and light – guaranteed pleasant to wear.
- Conforms to ISSF and DSB rules.

12 KNITTED CAP

Close fitting fine-knit cap with ribbing.
An inner headband made of fleece provides maximum wearing comfort.

Material: 70% polyacrylic, 30% wool

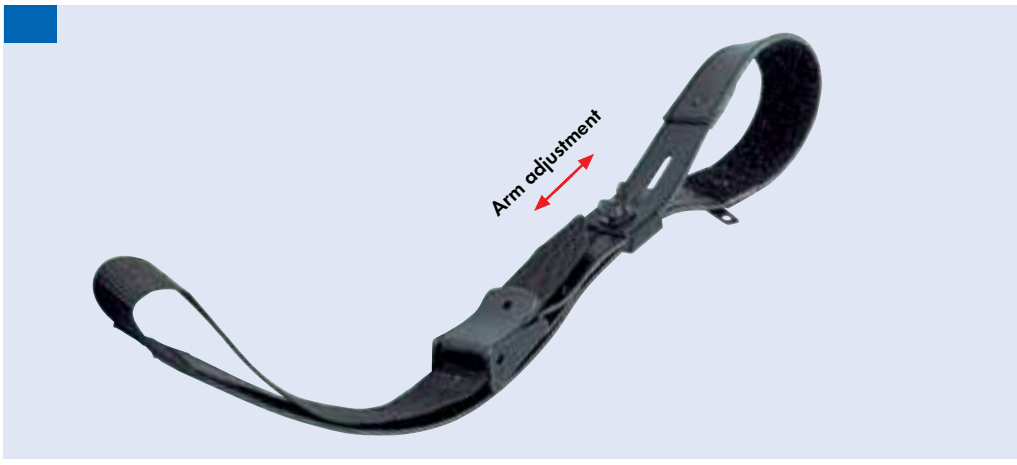
Item No.: 3208

TARGET SLINGS also available for left-handed shooters

1 Target sling CLIP

The ahg CLIP target sling has a new fine adjustment which allows quick and problem-free adjustment to any desired length when in the shooting position.

Item No.: 337



2 Target sling CONTACT

- Non-warping synthetic fabric.
- Simple adjustment of arm loop and arm length by means of buckles.
- This target sling can even be adjusted to very short arm lengths due to the long rows of holes, so there is no pressure from the buckle on the glove when in the shooting position.

Item No.: 334 (for right-handed shooters)
Item No.: 334-L (for left-handed shooters)
Item No.: 334-short (4 cm shorter)

3 Target sling SWING

The ahg SWING target sling is the latest development from ahg-Anschütz. In this case it is a target sling with combined fine adjustment.

This sling offers the following benefits:

- Easy adjustment of the length with one hand when in the prone or kneeling position, without having to leave the position.
- Automatic axial adjustment of the front part of the sling to guarantee a permanent optimum application of force in the shooting position.
- The sling fixing and the target sling are connected by a special tarpaulin type fastener, making it possible to couple and uncouple the sling quickly and conveniently with one hand.
- The arm loop with a 4-way adjustable receptacle for the tarpaulin fastener guarantees an optimum sling position.
- In addition the arm loop can be individually adjusted to the upper arm by a buckle.
- Special, non-stretch sling material with textile inlay guarantees optimum stability.

Item No.: 341 (for right-handed shooters)
Item No.: 341-L (for left-handed shooters)

4 Target sling PROFESSIONAL

Offers additional advantages such as the well-known benefits of the ahg target slings with the swivel clip.

- Variable adjustment of the arm loop with the swivelling metal clip.
- For right or left-handed shooters.
- Small hole spacing for fine adjustment.

Material: leather (no picture)

SOFT CASES

1 SOFT CASE FOR HUNTERS AND SPORTS SHOOTERS

Top quality soft case made from nylon material protects your sports gear during transport. The attached lock fulfills safety requirements according to gun laws.

- Robust nylon material, water-proof
- Sturdy 2-way-zipper
- 2 hinged accessory bags, one with pockets of various sizes
- Padded handle
- Lockable according to gun laws
- Lock attached to the soft case
- 6 cm thick inner padding
- 2 carrying strap

Dimensions: 127 x 28 x 9 cm

Item No.: 9213 (Soft case black/blue)

All specified case dimensions are exterior dimensions.

2 SOFT CASE FOR HUNTERS AND SPORTS SHOOTERS

Same like soft case 9213 but without ANSCHÜTZ Logo on the pocket. Colour is completely in black.

Dimensions: 127 x 28 x 9 cm

Item No.: 9213-S (Colour black, without Logo)

3 SOFT RIFLE CASE

- Inexpensive rifle case.
- Includes carrying strap.
- Pocket with zip fastener.
- Padded under smooth inner lining, therefore easy to clean

Dimensions: 120 x 28 x 5 cm

Item No.: 9206

SOFT CASES

1 PICK-UP SOFT CASE

ahg-Anschütz has developed the new "PICK-UP" soft case in constant contact and cooperation with top shooters. The "PICK-UP" soft case is fitted with a new zip fastener system and other useful details.

The sporting gun and its sensitive accessories can be accommodated and transported safely and securely. As a special feature, an additional carrying strap system enables the soft case also to be carried on the back.

You can also use the soft case as a pad to protect the rifle during assembly.

- Inner lining of anti-static material keeps dirt off the rifles.
- Fixing strap with velcro fastener holds the rifle securely in the soft case.
- The cut of the soft case follows the shape of the rifle, thus preventing the rifle from slipping.
- Variety of straps for holding tools and accessories.
- Integrated holder for a spare compressed air cylinder.
- Practical carrying handle.
- Carrying strap system allows the case to be carried comfortably on the back.
- Loop for hanging on a hook.

Dimensions: 125 x 28 x 9 cm

Item No.: 9209 (black)
Item No.: 9209-b (blue)

3 Rucksack - ALL-IN-ONE

The ALL-IN-ONE pistol rucksack from ahg-Anschütz is made for beginners and professionals who want to enjoy the benefits of easily manageable pistol shooting. There is room for all the equipment in the various compartments: pistol in the customary case, hearing protectors, pellet box, shooter's pass, shooting boots, shooting glasses, tools, pen and target disks.
With this ALL-IN-ONE product, it is impossible to forget any items of equipment - everything is stowed in view. Holders for a mobile phone and a drinks bottle complete this innovative product.

Item No.: 291

4 HUNTING AND SPORTS BAG

An ANSCHÜTZ development from experience! Large travel bag for hunters and shooters with extra compartment for the shotgun case and many additional practical pockets. At last a bag for everything! Ideal for air travel. With extendable push handle and rollers.

Dimensions: 91 x 42 x 38 cm

Capacity: approx. 140 litres

Item No.: 294

4

5

5 SHOOTING SPORTS BAG with wheels

The stylish ahg shooting sports bag with extendable push handle has all the features that a bag for shooters should have:

- Sufficient space for jacket, trousers, boots, stand, scope, gloves, etc.
- Robust construction of the base (5 mm plywood) gives the bag exceptional stability and prevents the base from bending.
- 2 skate wheels on the base in conjunction with holding and carrying straps provide a wide selection of carrying and rolling transport options.
- Extendable handle ensures comfortable pulling.

Dimensions: 70 x 40 x 33 cm

Capacity: approx. 90 litres

Item No.: 290

BAGS

1 SPORTS BAG - XXL

The sturdy XXL sports bag on wheels from ahg-Anschütz is padded all round to protect your valuable equipment.

The 160 litre capacity is divided up as follows:

- In the opened out top there is a zipped compartment which has sufficient space for a jacket or trousers.
- In the main compartment of the XXL bag there are 4 subdivisions in the base, 3 with zip fasteners and 1 with ventilation holes. They provide space and protection for all other objects. Other objects such as a jacket, stands or other accessories can be stowed in the compartments.
- The underbody is made of an injection moulded hard plastic and ensures that the ahg XXL SPORTS BAG does not sag when fully packed and does not tip over when upright.
- Wheels with ball-bearings from the field of in-line skates ensure that it runs easily and supports the weight effortlessly.
- A telescopic handle for pulling the bag and several hand-holds for loading or unloading are naturally provided as well.

Dimensions: 85 x 42 x 45 cm

Capacity: approx. 160 litres

Weight: 7 kg

Item No.: 296

1

1

2

2 SPORTS BAG - BIG

The new two-part sports bag can be opened out from the centre by means of a zip fastener and when opened guarantees you a comprehensive view of your accessories.

You can pack your shooting jacket and shooting trousers with the minimum amount of folding in the large, lockable, single-section compartment. This will look after your clothing and keep it in good condition for longer. You can organise your valuable accessories such as shooting boots, gloves, spectacles, etc. clearly in the three-section compartment. No more bothersome and time consuming searching. The skate wheels and the extendable handle make for easy, effortless transport of the ahg sports bag.

The strong plastic base prevents deformation and protects your equipment.

Other items can be stowed in the patch pockets at the side or in the upper section.

Dimensions: 80 x 40 x 34 cm

Capacity: approx. 108 litres

Item No.: 292

2

3

3 SPORTS BAG - BIG COLOR

The ahg-sport bag is opened up in the middle. One side can be locked by zipper, here you may store your jacket and pants lengthwise, both will thus last longer.

The other side is divided in three compartment, each one can be locked by zipper. You will see that it is no longer necessary to rummage your bag for the things you are looking for. Small compartments on one side of the bag may be used for targets, portfolios etc.

The bag has skate-board rolls and an extensible frame grip for easy pulling.

Dimensions: 80 x 40 x 34 cm

Capacity: approx. 108 litres

Item No.: 292-C

3

AMMUNITION and SERVICE BOXES

1 SHOOTERS CASE

This shooters case is perfect for going to the range or the field. Quickly and easily organize all your shooting or cleaning supplies for gun, bow or muzzleloader. There is even room under the lid for ear muffs and shooting glasses.

- Includes two StowAway Utility Boxes
- Bulk storage in the top

Dimensions: 42 x 30 x 34 cm

Item No.: 538

1

2 PLANO FIELD BOX

Top access lid opens up into deep storage and a large lift-out tray. Water resistant seals and durable latches make this box an easy choice for all your ammo storage needs.

- Comfortable handle
- Top access in lid
- Water resistant O-ring seal
- Secure brass-bailed latch
- Holds 6 boxes 2-34" or 3" shotgun shells

Dimensions: 38 x 20 x 25 cm
Colour: Camo

Item No.: 539

2

3 SHOOTERS' SERVICE BOX

- Big enough to stow all your cleaning implements inside.
- Clear organisation of all the parts stored within.
- A 'Must Have' for all hunters and target shooters.
- Removable base.
- Rubberised, plug-in rifle holder.

Dimensions: 56 x 36 x 29 cm

Item No.: 537

3

4

4 PLANO AMO BOX

Equally important as the safe transport of a target rifle is the safe transport of its associated high quality ammunition rifle is the safe transport of its associated high quality ammunition.

- Watertight, unbreakable and dustproof.
- Easy to open fastener.
- Rubber lining with the additional function of an O-ring seal for even more protection.
- Automatic pressure equalisation valve - equalises the pressure in the box but does not allow water to penetrate.
- Eyelet for a padlock.
- Is suitable for transporting up to 400 pcs. of .22l.r small-bore cartridges.

Dimensions: 23 x 12 x 8 cm
Colour: orange
Weight: 433 g
Item No.: 266

5

5 ACCESSORY BOX

Suitable for the safe keeping of accessories such as rear sights and sight sets. Due to the padding in the box, valuable accessories remain protected and do not slide about.

Dimensions: 30 x 6 x 18 cm
Item No.: 246

6

6 ACCESSORY BAG

For rear sights and hook butt plates. The ahg accessory bag was developed to keep accessories such as hook butt plates and rear sights safe. Due to the padding in the bag, valuable accessories remain protected and do not slide about. The dimensions of the bag are such that it fits into a side pocket on the BIG roller bag (Item No. 292) without difficulty.

Dimensions: 32 x 22 x 10 cm
Item No.: 295

SPOTTING SCOPES

1 SPOTTING SCOPE Nature-Trek

The Hawke Nature spotting scopes have fully multi-coated optics providing crisp, bright images.

Available in your choice of 24-72 x or 20-60 x magnification, the Nature family of spotting scopes is designed to deliver years of functional use for the budget minded consumer.

The tough rubber coating provides a waterproof body. Both Nature spotting scopes offer a complete kit with a hard storage case, soft carry pouch and fully adjustable aluminium tripod.

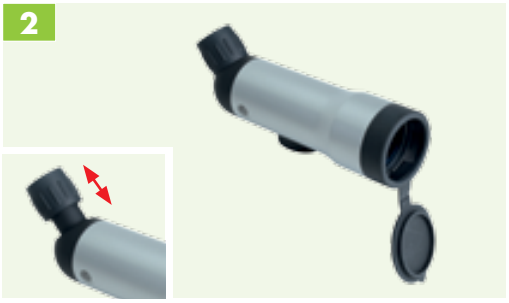
- Fully multi coated optics for maximum clarity
- Tough rubber coated body provides durability
- Lens covers to protect your investment
- Fully adjustable aluminium tripod included
- Hard storage case for protection when travelling
- Soft carry pouch for easy carry while backpacking
- Waterproof

Item No.: HT3651 (20-60 x 60)
Item No.: HT3653 (24-72 x 70)

2 SPOTTING SCOPE 20 x 50

- High quality spotting scope with water repellent surface and low weight, 300 g.
- Eminently suitable for all pistol disciplines.
- Due to its compact construction, 19 cm long, there is room for it in any bag.
- Includes: carrying bag and cleaning cloth.

Item No.: 443



3 PRONE POSITION TRIPOD

- Special tripod for prone shooting.
- Robust, stable tripod.
- Non-slip feet.
- Can be folded up to save space.
- Low weight (275 g).
- Includes swivel joint.

Item No.: 454

4 MINI SCOPE for pistol shooters

The ahg Mini Scope with 25 x 30 magnification is eminently suitable for pistol shooters. Due to its very short length of 19 cm, it can be accommodated without difficulty in any pistol case or bag to save space. Also supplied are a small table tripod with a swivel joint and a protective box for the scope and the tripod.

Item No.: 449

5 SPOTTING SCOPE 20 x 33

This high quality spotting scope in aluminium with a 45° angled eyepiece is eminently suitable for all pistol disciplines. With a total weight of 266 g and a length of 18 cm, there is room for it in any case. Includes carrying bag and tripod.

Item No.: 447

6 PRONE TRIPOD

The design of the folding struts on this prone tripod enable the shooter to position the tripod very closely and ergonomically to the shooting position.

A ball head supports the positioning of the spotting scope.

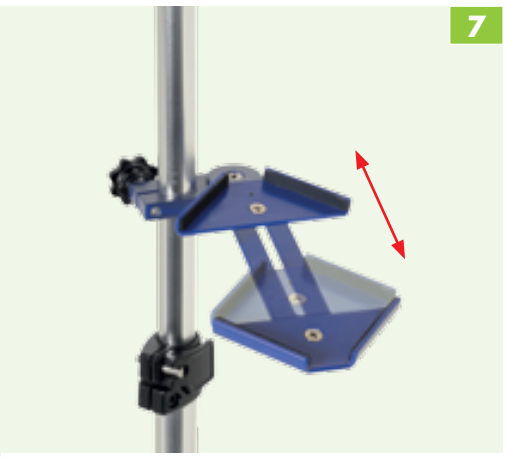
The folding struts and Y-shaped pedestal are milled from solid aluminum and can be mounted and dismounted quickly and easily by means of plug-in connections.

Recessed magnets in the struts and the base keep the struts in place.

With a few manual operations, the tripod can be dismantled quickly, without tools to save space, and stowed in the bag supplied.

Total weight incl. ball head: 770 g.

Item No.: 463



7 UNIVERSAL TRIPOD - TWIN

Two for the price of one.

The sturdy TWIN universal tripod can be used as a rifle rest or alternatively for target observation in all 3 shooting positions. The accessories required for this, such as the aluminium rifle rest plate, telescopic pole, ammunition rest, swivel head for the spotting scope, prone position adapter screw and pedestal are all included.

Depending on the requirements, the tripod can be used as a rifle and ammunition rest in the standing and kneeling positions or as a tripod for a spotting scope in all 3 shooting positions.

The sturdy TWIN universal tripod can be adjusted simply and quickly to any shooting position.

The eccentric clamps hold the individual sections of the telescopic pole. With a few operations, the tripod can be dismantled again and stowed in the supplied bag, where it takes up little space.

With the TWIN universal tripod, it is possible to set the telescopic pole to a maximum height of 170 cm.

Total weight: 1850 g (incl. swivel joint)

Item No.: 459

8 BALL HEAD

The technically elaborate clamping mechanism in the aluminium head can absorb large forces and specially coated surfaces complement the characteristics of stability and grip. The ball head has connection threads of 1/4" and 3/8".

Item No.: 450

9 GUN REST

The gun rest has a 1/4" thread and is screwed on to the telescopic pole of the ahg universal tripod.

Item No.: 456

10 AMMUNITION HOLDER

The ammunition rest is clamped on to the telescopic pole (Ø 21 mm) of the "TWIN universal tripod" or on the "RIFLE STAND GERMANY".

Item No.: 459-U1

11 Rifle stand GERMANY

This stand, made in Germany, is distinguished by the following features:

- Extremely light and compact construction, weight 1,5 kg.
- Y-shaped pedestal milled from solid aluminum.
- Folding struts on the base can be mounted and dismounted easily and quickly by means of plug-in connections.
- Recessed magnets in the struts and the base keep the struts in place.
- Three-part telescopic pole can be extended continuously from 68 to 160 cm.
- The ammunition holder is fixed to the telescoping pole and is adjusted to the shooting position.
- Aluminum plate with non-slip coating guarantees secure resting of the rifle.
- The design of the base allows space-saving and ergonomic positioning of the tripod to the shooting position.
- With a few manual operations, the tripod can be dismantled quickly, without tools to save space, and stowed in the bag supplied.

Item No.: 460

IRIS DISCS

Well adjusted...is half way there!

The continuously adjustable iris disc enables optimum focus adjustment. By opening and closing the iris, the shooter can see the sharpness of the target changing.

The best results are obtained in the range 1.0 – 2.0. The range above 2.0 can be helpful if a shooter has his eye far away from the rear sight – e.g. when shooting in a standing position.

Below 1.0, the iris aperture may appear unround, unsharp, angular or contaminated by dust filaments. However, this is just a physical effect which occurs as a result of the small diameter. If you check the iris at its smallest setting with a magnifying glass, you will see that the aperture is perfectly round. There is scarcely any use for this extremely small range.

Very dark.
Unsharp image.

Best image of target.
Optimum adjustment possible.

Iris aperture very large.
Large distance
Rear sight / Eye.

1 IRIS DISC

- Eyepiece with interchangeable diaphragm ring - SMALL.
- Adjustment range 0,5 – 3,0 mm.
- 15 lamellar segments
- Extra short construction.

Item No.: 9775-S (black)
Item No.: 9775-O (orange)

1

2 IRIS DISC

With 5-colour filter. A combination of ahg iris disc Item 9775 with 5 glass filters in the colours:
light grey, dark grey, orange, yellow, C 41 blue.

- Eyepiece with interchangeable diaphragm ring - SMALL.
- Adjustment range 0,5 – 3,0 mm.
- 15 lamellar segments

7 IRIS DISC - TWIN
with 10 colour filters and full polarisation

As for Item 9786 but with integrated polarization filter.
- Improved handling due to new colour filter changing rings.
- Adjustment range 0,8 – 1,8 mm.
- 15 lamellar segments.

Item No.: 9787-S (black)
Item No.: 9787-O (orange)

8 IRIS DISC

With polarization filter.
- Eyepiece with interchangeable diaphragm ring - SMALL.
- Adjustable from 0,5 – 3,0 mm.
- 2 independently adjustable polarisation filters to minimise reflections.
- Continuously variable brightness control.
- Dimming and polarisation are separately adjustable.
- Both diaphragms can be swung aside to give a direct view.

Item No.: 9780-S

9 IRIS DISC

With new lens optics.
- Iris disc with 1.5x magnification (from –4.5 to +4.5 diopters).
- Enables the shooter to adjust the image of the target exactly to the requirements of his eye.
- Extra short construction.

Item No.: 9530

10 IRIS DISC

With full polarisation and optics.

Item No.: 9551

11 IRIS DISC

With 5-colour filter and optics.

Item No.: 9570

12 IRIS DISC

With 5-colour filter, optics and full polarisation.

Item No.: 9575

13 ADAPTER

Can only be used on iris discs with optics: (Item 9530, 9551, 9570, 9575), so that these can also be used without optics.

Item No.: 9577

14 IRIS DISC - ERGO
- Iris disc with 5-colour filter (light grey, grey, yellow, peach and C 41 blue).
- New shape, specially designed for older shooters, optimised handling.
- Large numbers for good legibility.

Item No.: 9788

Available with 1.5x optics and integrated diopter compensation (+/– 4,5). (No illustration).
Item No.: 9789

OPTICS

1 DUO-IRIS APERTURE INSERT*

The inner and outer diameters of the aperture insert are continuously variable and thus offer the optimum possibilities for adjusting to the particular target sizes or lighting conditions. Due to its extremely wide adjustment range (see table) the duo iris aperture can be used for all disciplines. The duo iris aperture insert is available in 2 versions as a free-standing glass aperture Item 9760/9761 and also with cross hair, Item 9750/9751. The cross hair can be changed to a lateral hair for airgun disciplines, as with Item 9740.

2 SUPER-IRIS APERTURE INSERT

- The diameter of the aperture is continuously variable from 2,8 to 4,8 mm for optimum adjustment to the lighting conditions and target sizes during competitions. The ring size remains constant.
- The cross hair can be changed to a lateral hair with the tool supplied.
- This ahg aperture insert is also delivered with a larger knurled ring to cover the view of the target better.
- The ahg Iris aperture insert is supplied with an M18 x 0.5 thread.
- Additioanaly this item is delivered with a silver front ring, for a different target contrast

Ø M18 x 0.5		Width	Type
2,8–4,8	**Item No.: 9740**	1,6 mm	
2,3–4,3	**Item No.: 9742**	1,6 mm	
3,8–5,8	**Item No.: 9743**	2,0 mm	

SUPER-IRIS GLASS APERTURE INSERT

- Just like our proven ahg Super Iris aperture insert, Item 9740, the new ahg Iris Glass aperture has an extremely wide range of adjustment, which is made possible by the unique 2-claw design of the iris.
- The Iris Glass aperture is simply screwed into the front sight and is continuously adjustable.

1

2

3

4

3 GLASS APERTURE - HIGH END

The aperture carrier is held in a ground glass carrier. In contrast to the previously used plexiglas, this is absolutely distortion and deformation free.
The combination of glass and matt black aperture produces maximum contrast. The use of glass and metal as materials gives the HIGH END temperature stability and thus makes it also ideal for large calibre rifles. Supplied without front sight.

Diameters available:
Aperture width from 1.2 mm, in 0.1 mm steps.

Item No.: 9507 For M18 x 0.5 (Ø 3,0 – 7,5 mm)
Item No.: 9508 For M22 x 0.5 (Ø 3,0 – 10,0 mm)

4 Front Sight - STRONG

The new ahg STRONG front sight is distinguished by the following features:

- Particularly sturdy.
- Milled slot at side for easier insertion and removal of the steel front sight insert, furthermore the size of the insert used can be seen (Front sight M 22 has no milled slot).
- Sturdy new clamping device, particularly suitable for 300 m, long range and crossbow.
- Suitable for Models 1407 – 1813 (replaces Anschütz front sight, Item 6523).

Item No.: 9759 for front sight M18
Item No.: 9763 for front sight M22

5

5 SUPER-IRIS-VARIO APERTURE INSERT

The first aperture insert in the world on which the tilt can be set at any time in a few seconds without the need for a tool. The insert is screwed into the front sight to the end stop by hand. It is not necessary to observe any particular orientation. The locking nut is then tightened with the hook spanner. The insert is fixed but can be rotated on its own axis to set the tilt. (There is a scale on the housing for orientation). The cross hair or lateral hair can be adjusted to the degree of tilt in any position by simple rotation and identified by a marking on the front sight. If the position is changed, the aperture can be rotated according to the marking. The cross hair can be changed to the lateral hair (as with Item 9740).

Ø M18 x 0.5		Width	Type
2,3–4,3	**Item No.: 9735**	1,6 mm

7 Front sight - SWING

This absolutely novel design allows the sight to be turned around its own axis without the need for tools.

- The torque, i.e. the resistance to movement can be set variably on a handy adjusting collar.
- Tilt pins fitted to the sight can be easily removed.
- The scale on the sight allows the setting of different tilt angles to be repeated in the various shooting positions.
- Very pleasant target image due to the absolute symmetry and the narrow bar between the front sight base and the sight.
- The narrow bar can also be used for checking the tilt.

OPTICS

1 SPECIAL INSERT SET

A set consisting of sizes:
Ø 3,3/3,5–3,9/4,1/4,3/4,5 = 9 pcs.
- Low scattered light.
- Absolutely dazzle and reflection free.
- Strong contrast enhancement.
- Optimum depth of field.
- Constant ring width.

For M18 thread
Item No.: 9724-U8 (yellow)
Item No.: 9725-U8 (red)
Item No.: 9726-U8 (blue)
Item No.: 9727-U8 (crystal clear)

For M22 thread
Item No.: 9727F-U8 (crystal clear, without clamping screw)

2 TRANSPARENT INSERT SET

A set for M18 thread, with diameters:
3,2 / 3,4 / 3,5 / 3,6 / 3,8 / 4,0 / 4,2 / 4,4

Item No.: 9720-U8 (crystal clear)
Item No.: 9721-U8 (yellow)
Item No.: 9722-U8 (grey)
Item No.: 9723-U8 (red)
Item No.: 9719-U8 (pink)

3 SPECIAL INSERTS

New front sight insert, enhanced from an optical point of view, with significantly higher contrast. Due to the special geometry of the metal bush inset in the plastic body, light rays incident on the aperture are deflected outwards. Consequently the inner area of the aperture is practically free of scattered light, so that the target image appears with significantly greater contrast.

Available singly from 2,8 to 5,5 mm. For M18 thread.
Increments: 2,8–4,1 by 0,1 mm; 4,3–5,9 by 0,2 mm
Item No.: 9724 (yellow)
Item No.: 9725 (red)
Item No.: 9726 (blue)
Item No.: 9727 (crystal clear)

For M22 thread
Item No.: 9726 F (blue)
Item No.: 9727 F (crystal clear)

4 DUST CAP

Item No.: 9722-2 (for M18 front sight)
Item No.: 9722-3 (for M22 front sight)

5 TRANSPARENT FRONT SIGHT INSERTS

For M18 thread.
Item No.: 9719 2,8–6,0 mm (pink)
Item No.: 9720 2,8–8,0 mm (crystal clear)
Item No.: 9721 2,8–4,8 mm (yellow)
Item No.: 9722 2,8–4,8 mm (grey)
Item No.: 9723 2,8–4,8 mm (red)

For M22 thread
Item No.: 9720 F 2,8–9,1 mm (crystal clear)

6 CLAMPING RING for insert

For 9720 to 9727.

Item No.: 9722-1 (M18 x 0.5)
Item No.: 9722-4 (M22 x 0.5) (not shown)

7 OPTICAL LENS

Item No.: 9505-03 (0.3 diopters / M22)
Item No.: 9505-05 (0.5 diopters / M22)
Item No.: 9505-075 (0.75 diopters / M22)
Item No.: 9513-03 (0.3 diopters / M18)
Item No.: 9513-05 (0.5 diopters / M18)
Item No.: 9513-075 (0.75 diopters / M18)

13

14

15

15 Iris disc TINY

- Iris disc with integral 5-colour filter (grey, dark grey, c41 blue, yellow, peach).
- Extremely small size.
- Specially developed for the SPY rear sight and the SIGHT BASE 10-50.

Item No.: 9514

8 SPIRIT LEVEL

- Two sizes, M18 and M22.
- Adjustment without the need for tools.
- Exact reproduction of different tilt angles.

Item No.: 9503 (for M18 front sight)
Item No.: 9504 (for M22 front sight)

9 SPIRIT LEVEL

For checking tilt without changing the head position. The spirit level is fixed to the dovetail directly in front of the rear sight.

- Easy, continuous adjustment while in the shooting position by means of the knurled screw.
- Easy centring of the front sight, as the level is not visible in the target image.

Item No.: 9506

10 REAR SIGHT SPY SHORT

Precision rear sight in aluminium, includes anti-glare tube

- Extremely narrow and compact.
- 24 clicks (0,02 mm per click).
- Wind flags can be observed with out difficulty in the shooting position.
- Illustration shows the CRYSTAL iris disc special accessory.

Item No.: 9515 (for Anschütz)
Item No.: 9515F (for FWB)
Item No.: 9515W (for Walther)

11 CRYSTAL IRIS DISC

Iris disc, short, compact, transparent

- Smallest fully serviceable iris, 0.8 – 1.8 aperture.
- Only 1cm diameter, extremely short.
- Transparent housing.
- Fits all current rear sights.
- Illustration shows example of mounting on the SPY SHORT REAR SIGHT.

Item No.: 9516

12 LENS

Push-in colour filter for SPY anti-glare tube (only fits SPY REAR SIGHT).
Easy to fit, easy to clean.

Available in the following colours:
light grey, grey, dark grey, brown, green, yellow, orange, C41 blue, C41 UV and C41 peach.

Item No.: 9517 (+colour)

13 FRONT SIGHT CRYSTAL

Transparent housing for maximum brightness and contrast

- Infinitely adjustable about its own axis
- Insertable cross pins for checking tilt
- Outstanding target image

Item No.: 9518 (M18 for Anschütz)
Art.-Nr.: 9519 (M22 for Anschütz)

14 Rear sight SIGHT BASE "10-50"

Rear sight for 10, 50 and 100 meters.
Ground, ball-bearing mounted, fine-threaded spindles in stainless steel guarantee absolute precision. This sight base has the advantage that the shooter can still observe the environment e. g. the wind conditions. The shooter still has an overall view while taking rough aim.
When shooting outdoors, it also allows better observation of the weather conditions such as wind or mirage.
1 click at 10 m corresponds to 0,25 mm and at 50 m, to 1,22 mm.
The total weight of the rear sight is around 200 g.
Can be used with all current sports rifles.

Item No.: 9805

ACCESSORIES

1 Raiser Block - TOWER

The robust two-sided toothed profile of the TOWER raiser block allows a simple and sturdy adjustment of the sighting line in 8 stages without spacers and discs. This offers many advantages especially when in the standing or kneeling position. Twisting of the head when sighting the target is reduced to a minimum, thus largely avoiding tension in the neck or back areas. The basic height is 27 mm and can be raised in 1,5 mm steps to a maximum of 38 mm.
Due to the long rail of the TOWER, the rear sight can be moved closer to the eye, which is an advantage especially for benchrest shooters.
The Tower raiser block is clamped without distortion to the barrel and prism block with spring-loaded jaws.
The Tower raiser block may be used for all air and small-bore rifle disciplines. With air rifle shooting, however, care must be taken that the height of 60 mm permitted by the sporting regulations is not exceeded. The measurement is made from the centre of the front sight to the centre of the barrel.
Suitable for all ANSCHÜTZ rifles.
Weight: approx. 119 g

Item No.: 6928 (For ANSCHÜTZ rifles)
Item No.: 6928F (For FWB rifles)
Item No.: 6928W (For Walther rifles)

2 Raiser Block - TOWER PLUS for small-bore rifles

The bridging of the loading platform stabilises the receiver. Vibrations arising in this area during shooting are reduced, thus improving shooting performance.
Due to the long rail of the TOWER, the rear sight can be moved closer to the eye, which is an advantage, especially for benchrest shooters. The Tower raiser block is clamped without distortion to the barrel and prism blocks with spring-loaded jaws. The raiser block may be used for all small-bore rifle disciplines. The 165 mm long rear sight rail offers many options for mounting sighting devices and accessories.
Suitable for all Anschütz small-bore rifles.
Weight: approx. 200 g

Item No.: 6929 (For ANSCHÜTZ rifles)

3 Raiser Block - CLUB

- Height and laterally adjustable raiser block.
- Basic height 10 mm.
- Height variable in 4 mm steps up to 22 mm.
- Sighting line can be moved laterally by 4 mm in one step.
- Rear sight rail can be shifted back by 25 mm (Mini-tele).

Item No.: 6916 (For Match 54, 1407–1813)
Item No.: 6917 (For Walther rifles)
Item No.: 6918 (For FWB rifles)
Item No.: 6919 (For Anschütz rifles Model 1903–9003)

4 Raiser Block - XXL

The 20 mm elevation offers advantages primarily in the standing and kneeling positions. The twisting of the head when sighting the target is reduced to a minimum, thus largely avoiding tension in the neck or back areas.
The raiser block may be used for all air and small-bore rifle disciplines.

Item No.: 6922 (For Anschütz rifles Model 1903-9003)
Item No.: 6921 (For FWB rifles)
Item No.: 6920 (For Walther rifles)

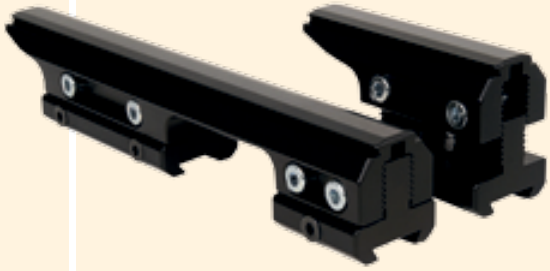
5 Raiser block - TRACK

- Variable lateral adjustment.
- Elevation 9 mm.

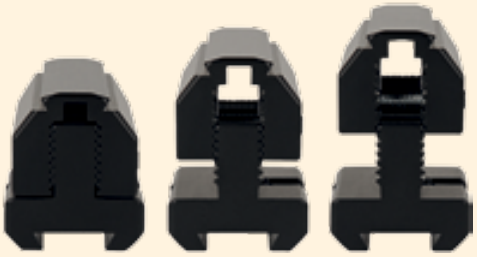
Item No.: 6924 (For Anschütz rifles)
Item No.: 6925 (For FWB rifles)

1

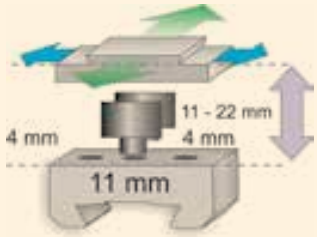
2



Elevation adjustment for TOWER and TOWER PLUS



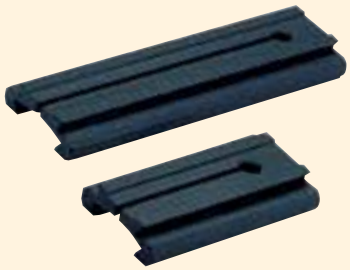
3



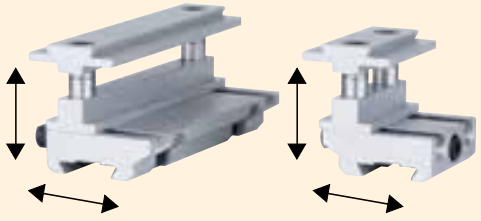
4

5

6



7



6 RAISER BLOCK

- 100% fit.
- For Anschütz Model 1903-2013.
- Only 4 mm high.

Item No.: 6923

7 VRaiser Block - TRACK MAX

With the TRACK MAX the sights can be moved laterally, thus optimizing the head position. The basic height is 22 mm. It can be extended to 27 mm in 1 mm steps. Continuous lateral movement up to 8 mm is possible. These individual adjustments allow an even more perfect adjustment of the sights, especially in the standing or kneeling position. Tension in the neck or back muscles can virtually be eliminated.

Item No.: 6926 (For ANSCHÜTZ rifles)
Item No.: 6926F (For FWB rifles)
Item No.: 6926W (For Walther rifles)

8 RUBBER EYESHADE for rear sight

Item No.: 9700

9 EYESHADE

- Fold-up eyeshade for the non-aiming eye.
- Rubberised clip for secure, non-slip clamping to all current spectacle frames.

Item No.: 9777-1 (white)
Item No.: 9777-2 (translucent)

10 EYESHADE with iris disc

- Fold-up eyeshade.
- Adjustable iris disc.
- Rubberised clip for secure, non-slip clamping to all current spectacle frames.

Item No.: 9778

11 REAR SIGHT EYESHADE including 2 plates

The ahg Rear Sight Eyeshade is simply pushed on to the existing iris or sight disc aperture. The two plastic plates supplied (translucent and black) can be swung out individually as desired.

Item No.: 9497

12 EYESHADES

For rubber eyeshades. The ahg eyeshades can simply be attached to existing rubber eyeshades (ahg 9700 or JGA 6700-20) which have a diameter of 27 mm. The two plastic plates (translucent and black) can now be swung out individually as desired.

Item No.: 9496

13 EYESHIELD for sight disc aperture

- In Sikolex or Lexan.
- Is simply pushed on to the iris aperture disc to cover the non-aiming eye.
- The eyeshield can be individually cut to size.

Item No.: 9776-1 (white)
Item No.: 9776-2 (translucent)

14 EYE SHIELD

The eye shield is simply put over the existing iris disc or sight disc aperture and covers the non-aiming eye. In order to find the best position of this shield for your shooting position, the ahg-cover shield can be turned 360° around the rubber eyeshade. The eye shield conforms to the rules of DSB and ISSF.

Item No.: 9492 (translucent)
Item No.: 9493 (black)

15 Strasser eye shield - SMALL

- Conforms to the new DSB and ISSF rule.

Item No.: 9494 (black)
Item No.: 9498 (white)
Item No.: 9499 (translucent)

16 Strasser eye shield - BIG

Item No.: 9500 (black)
Item No.: 9501 (white)
Item No.: 9502 (translucent)

ACCESSORIES

1 DUPLEX

The Duplex is, like an iris disc, an accessory element that can be adapted to a rear sight and is thus a part of the rear sight. An anti-glare tube can be screwed on to many commercially available rear sights. This tube forms the supporting element for the Duplex, which is attached by means of a clamping piece.

The Duplex can be used with the Duplex Iris or the Duplex Insert (Ring).

Item No.: 9767

2 DUPLEX Insert

The Duplex Insert is a ring similar to an aperture insert which, from an optical viewpoint, lies in the plane of the iris rear sight opening. This ring divides the halo between the iris rear sight opening and the front sight. The effect is a sharper image of the target and the recognition of aiming errors.

Available in hole sizes 3.8 to 4.6.

The position of the Duplex Insert is adjustable both laterally and in elevation by means of the X-Y adjusting unit, in order to centre the ring of the insert

Item No.: 9768 (yellow)
Item No.: 9769 (clear)

3 DUPLEX Iris

The Duplex Iris provides containment and shadowing of the halo between the iris rear sight opening and the front sight. This facilitates the centring of the front sight in the iris rear sight opening for some sportsmen, aiming precision increases and older shooters can see the insert and target more sharply.

The position of the Duplex Iris is adjustable both laterally and in elevation by means of the X-Y adjusting unit, in order to centre the aperture of the Duplex Iris.

Item No.: 9770

4 COLIMATOR

Ball joint for the lens hood is required for aligning the anti-glare tube (lens hood) or the Duplex when the adjustment range of the Duplex is insufficient.

Item No.: 9785

SPY COLIMATOR

Anti-glare tube with integrated ball joint for Spy rear sight as a support element for the Duplex.

Item No.: 9785-U1 (not shown)

5 LENS HOOD ANS

- Anti-glare tube suitable for centra-sight-base, MEC free-sight and Anschütz rear sights (6702/6802)
- Facility for mounting the following accessories: DUPLEX, LENS, LENSPOL

Item No.: 9772

LENS HOOD 7020, suitable for 7002 rear sight

Item No.: 9771

LENS HOOD FWB, suitable for Feinwerkbau rear sight

Item No.: 9774

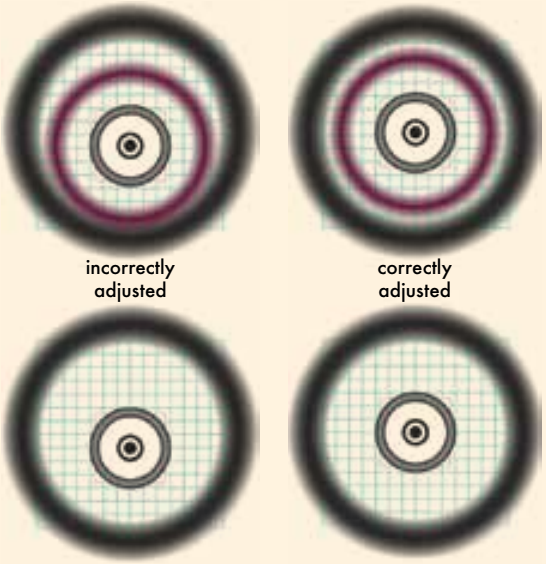
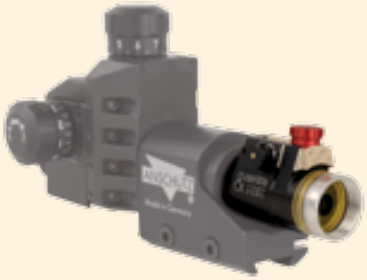
INFO



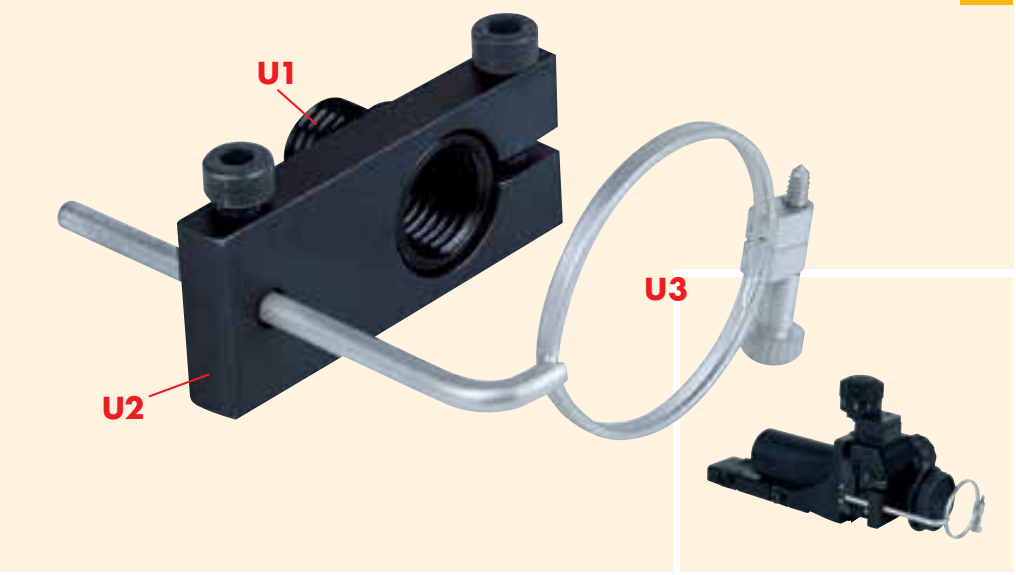
incorrectly adjusted

correctly adjusted

Application examples



6



6 MONOFRAME for 25 mm spectacle lens

Your individually corrected spectacle lens is clamped in the ahg-Monoframe. Using a thread adapter and a clamping block, the ahg Monoframe is mounted centrally in front of the rear sight or iris disc. Your sight defect is thus corrected directly at the iris disc and consequently aiming errors are avoided to a large extent.
Only spectacle lenses with an outside diameter of 24 mm can be used.
The ahg MONOFRAME does **not** conform to the currently applicable rules of ISSF, but can be used for many other disciplines.

Item No.: 9450 (for all diopters)
Item No.: 9450 B/B (Busk/Busk)
Item No.: 9450 B/A (Busk/Anschütz)

Item No.: 9450-U1 (Adapter screw)
Item No.: 9450-U2 (Holder for lens frame)
Item No.: 9450-U3 (Lens frame)

6

7 Lateral sightline offset

If you are a right-handed shooter but have to aim with the left eye, you can compensate for this disadvantage with the newly developed ahg Master Eye. This lateral sightline offset allows aiming with the left eye for right-handed shooters or the right eye for left-handed shooters. The rear sight remains over the axis of the barrel and affects the axial balance of the rifle only minimally.
For transport in a rifle case or soft case, the complete rear sight can be detached or only the side mount part. The side mount and the 2-part adapter screw have a toothed profile and an adjustment pin. The position of the side mount can be fixed repeatably with a clamping screw. The rear sight can remain mounted on the rifle if necessary.

Item No.: 1015 (incl. M 18 front sight, suitable for all current target rifles)

Item No.: 1016 (incl. M 22 front sight, suitable for all current target rifles)

Better sight with the other eye (Master eye)

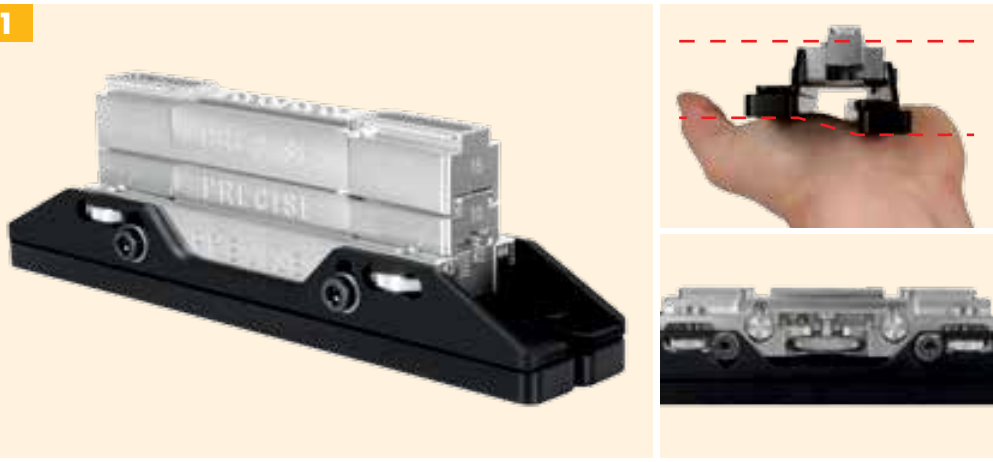
7

ACCESSORIES

1 Forend raiser block Precise PLUS

A new forend raiser with unmatched adjustment possibilities. This carrier's core is made from aluminum and offers 5 individual snap and/or thread adjustments. The forend raiser block Precise PLUS simply slides into the stock and is fastened in the required position. Both resting surfaces are made from plastic and are fixed on the alu carrier with an angle bracket and therefore can be adjusted individually in height, width and angle in order to adjust the contact to the supporting hand. This is especially important if the stock rests on the palm of the shooter's hand. Minimum height of 23 mm can be expanded steplessly to a maximum of 37 mm. Two additional spacers of 10 and 15 mm can be expanded the forend raiser block to a maximum of 67 mm. Minimum width of 36 mm can be expanded to a maximum of 68 mm.

Item No.: 1010



2 Adjustable forendstock "ANGLE"

- To achieve a natural hand position in prone and kneeling shooting
- Relaxed shooting with 10 degree angle (15 degree)
- Optimum pressure distribution Hand-shank-hand stop
- Setting the user's hand width, 40 mm to 50 mm
- Height-adjustable (optional) 10 mm and 20 mm
- Reduction of pain in the hand area
- Can be used with any rifle stock
- Weight 280 g.

Item No.: 1017 (10°, Angle 10)
Item No.: 1018 (15°, Angle 15)

3 Alti 5

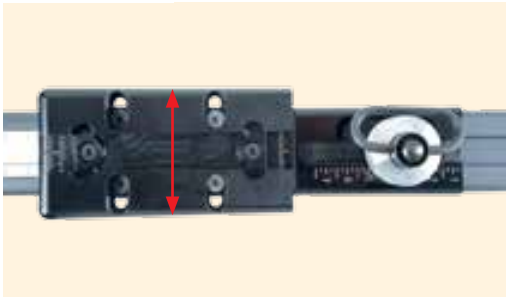
- additional 5 mm raiser for Angle 10°/15°
- is compatible with Alti 9 or Alti 5
- weight with screws, 35 g

Item No.: 1019

4 Alti 9

- additional 9 mm raiser for Angle 10°/15°
- is compatible with Alti 9 or Alti 5
- weight with screws, 65 g

Item No.: 1020



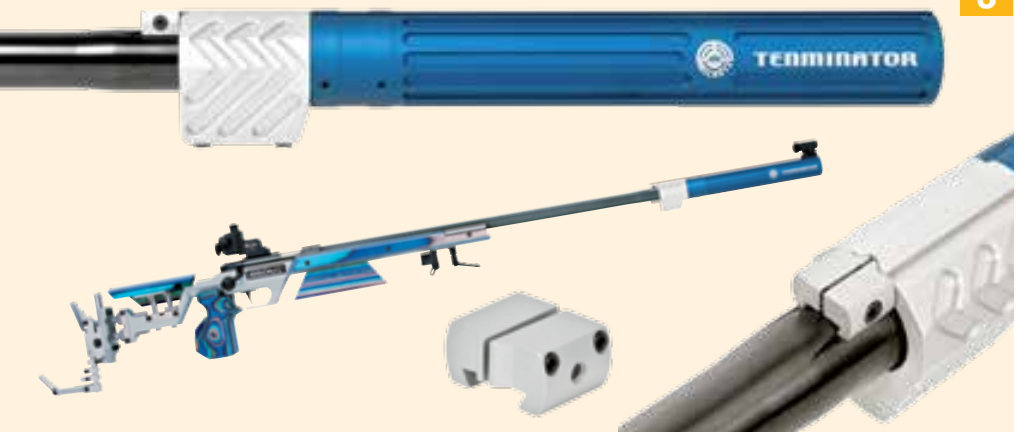
5 BARREL EXTENSION
for Anschütz 2013-U6 short barreled actions

The extension of the sights by 194 mm guarantees precise aiming and an improved depth of field of the whole target image, especially when shooting in the prone position.
The additional weight of 107 g, increases the muzzle inertia during firing and thus stabilises the rifle in the shooting position.
The muzzle tube can be dismounted for cleaning and transport by loosening the clamping screws.

Overall length: 440 mm
Sight extension: 194 mm
Total weight: approx. 485 g

Item No.: 4516

6



6 Muzzle tube TENMINATOR

The extension of the sights by approx. 250 mm guarantees precise aiming and an improved depth of field of the whole target image, especially when shooting in the prone position. The additional weight of approx. 270 g, increases the muzzle inertia during firing and thus stabilises the rifle in the shooting position.
The newly developed muzzle coupling can be adjusted to the diameter of the barrel and allows a stable and secure fastening of the muzzle tube from 21 to 26 mm. Fitting to all current match rifles is therefore possible.
The muzzle tube can be dismounted for cleaning and transport by loosening the clamping screws. An 8 mm raiser block, which is required for the rear sight, is not supplied.
Muzzle tube with adjustable clamping muzzle coupling.

Outer diameter:	40 mm
Inner diameter:	35 mm
Overall length:	approx. 300 mm
Sight extension:	approx. 250 mm
Adjustable clamping:	21 – 26 mm
Total weight:	approx. 270 g

Item No.: 4514

7

7 REAR SIGHT ROTARY KNOB SET

For ANSCHÜTZ 6805 / 7002 rear sight.

Item No.: 4806-3 (blue)

8

8 HAND STOP - INTEGRAL

You need the right equipment for a successful competition. The ergonomic, ideally designed ahg INTEGRAL HAND STOP can make a significant contribution towards bringing out your best performance. The handstop is adjustable in all directions and adapts to your shooting hand without compromise. Individual adjustments to the hand stop (horizontal, vertical, axial and radial) distribute the high forces that are transmitted from your target sling to your hand. The concentration required for a precise shot will no longer be disturbed by an aching hand.

Item No.: 6229

9

9 HAND STOP with sling swivel

The sling swivel stud is detachable and can remain on the target sling.

Item No.: 6226-1 (silver)
Item No.: 6226-2 (purple)
Item No.: 6226-3 (blue)
Item No.: 6226-4 (orange)

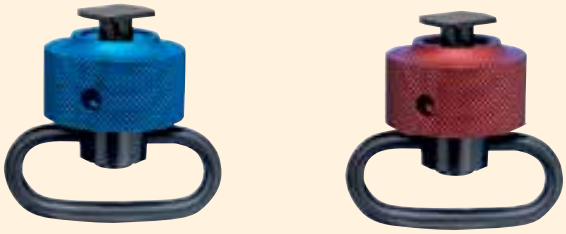
10

10 HAND STOP - SMALL with sling swivel

The sling swivel stud is detachable and can remain on the target sling.

Item No.: 6225

11



11 SLING SWIVEL with push button

Suitable for hand stops 6225, 6226, 6227, 6229 and 4572.

Item No.: 6226-13

ACCESSORIES

1 BI-POD

The bi-pod ensures that the rifle is set down safely when preparing for a competition. The wide spacing of the balls gives the weapon a secure position when set down. The two supports can be folded in to save space during transport.

Item No.: 9793

2 Bipod PRECISE

Push the button and the feet will simply retract.
The bipod does not have to be de-mounted from the gun during competition (conforms to ISSF rules).
Safe deposition of the rifle before, during and after competition.

Weight: 108 g

Item No.: 9796

3 Bipod FREE

No demounting during competition (conforms to ISSF rules). No vibration thanks to spring technique. Safe deposition of the rifle before, during and after competition. The basic body is formed from hard plastic, therefore small total weight of only 95 g.

Item No.: 9794

4 UNI TOOL

Includes all the important Allen key sizes and a screwdriver as needed for adjusting screws on the rifle.
Sizes 2,5 mm, 3 mm, 4 mm and a screwdriver.

Item No.: 1200

5 TORQUE WRENCH

New design helps to ensure a constant torque when tightening the stock set screws of target rifles.
Adjustment range of 4 – 12 Nm.

Item No.: 4506-SW4 (incl. 4 mm insert)
Item No.: 4506-SW5 (incl. 5 mm insert)

6 INSERTS FOR ITEM 4506

Item No.: 4505-1 (4 mm)
Item No.: 4505-2 (5 mm)

7 SPECIAL TRIGGER SHOE

- Constant finger position.
- Uniform trigger weight.
- 2 types of finger contact selectable (pointed or round).

Suitable for FWB and Hämmerli.
Item No.: 9715

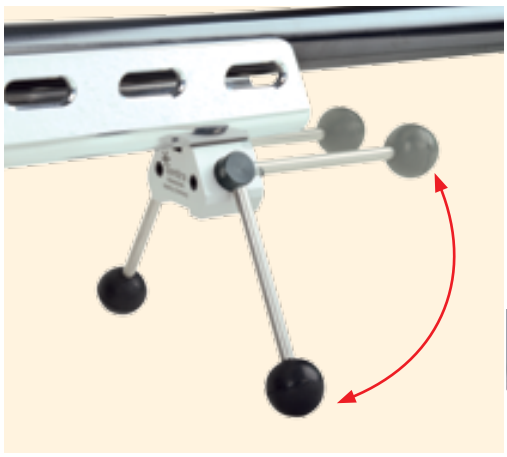
Suitable for Anschütz 1907–2013 with trigger blade.
Item No.: 9716

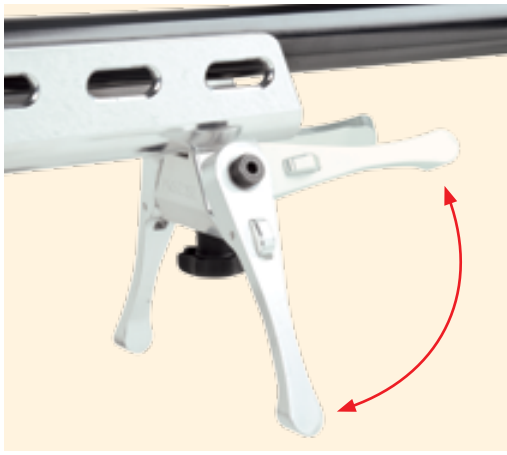
8 TRIGGER SHOE

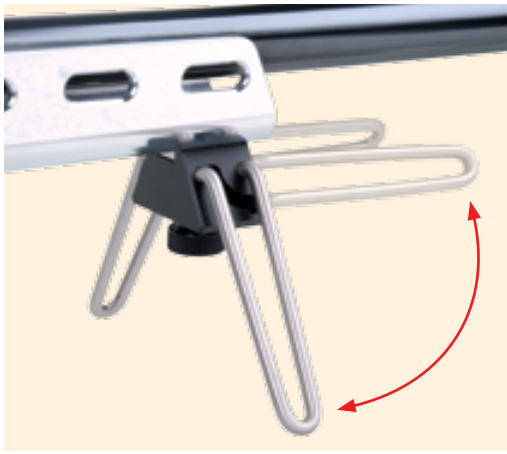
For Anschütz triggers 5018/5071.

- Constant finger position.
- Variable height adjustment.
- 360° rotating trigger ball.
- Variable length adjustment of trigger blade. (can be adjusted further forward than the original blade).

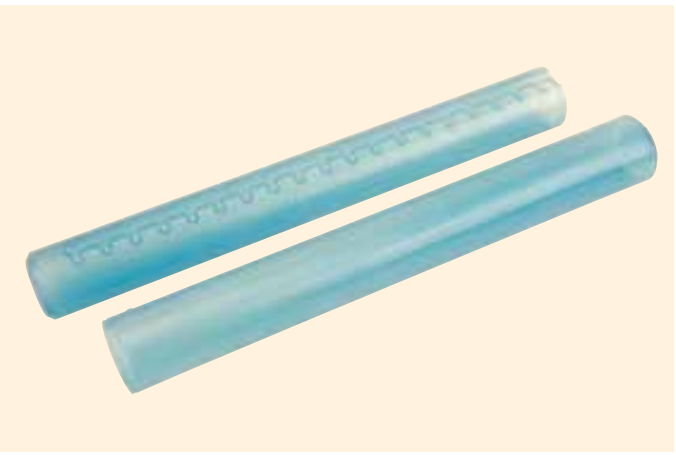
Item No.: 9717







9715 9716



9 Mechanical trigger shoe - SENSOR

The requirement for the use of the mechanical trigger shoe is a directly set (no first stage) trigger. Direct adjustment can gain valuable time when pulling the trigger. Due to a short lever movement and the use of an adjustable precision spring, the trigger operation between first stage travel and second stage is very clean and clearly defined at the second stage. An uncontrolled release (pulling when ready to fire) e.g. due to stress is virtually impossible.

- The weight of first stage is adjustable (screw 1) from 10 to 70 g.
- The first stage travel is individually adjustable (screw 2).
- The contact surface or finger position is adjustable in height (screw 3).
- The trigger shoe can be adjusted sideways (screw 4).
- The trigger shoe can be swivelled and rotated about the centre column (screw 5).
- Optimum adjustment guarantees safe and clean pulling of the trigger.

Item No.: 9718

10 PROTECTIVE WRAPPING for compressed air cylinders

This protective wrapping can be adjusted in stages from 35,5 to 57 cm and protects the compressed air cylinder from damage, dust and moisture. Valves and threads on the compressed air cylinder thus remain protected. Suitable for ANSCHÜTZ, FWB, Walther and other cylinders up to a diameter of 33,5 mm. Supplied without the compressed air cylinder.

Item No.: 1320

11 BARREL WEIGHT

- Weight: 200 g.
- For barrel diameter 20 – 22,5 mm, e.g. for ANSCHÜTZ Models 1407 – 1907, 2001 – 2002.
- Felt strips prevent scratches.

Item No.: 8007

12 Balance weight - Model SWISS

The SWISS balance weight, for free firearm and sports rifle is simply pushed onto the swivel rail of the fore-end and fixed manually with the detent lever. After fixing, detent lever can be set to the zero position. The 4 ring weights (25 g each) can be moved individually on the graduated weight rail as desired and thus be adjusted to the shooter's required balance. The total weight is approximately 204 g and can be increased by a further 6 ring weights.

Item No.: 8022

13 ALUMINIUM BALLS

For screwing onto the bolt handle. M8 thread.

Item No.: 4804-1 (gold)
Item No.: 4804-2 (purple)
Item No.: 4804-3 (blue)
Item No.: 4804-4 (red)
Item No.: 4804-5 (green)
Item No.: 4804-6 (silver)

14 Bolt handle head - DESIGN

For screwing onto the bolt handle.
M8 thread.

Item No.: 4805-3 (blue)
Item No.: 4805-4 (red)
Item No.: 4805-6 (silver)

ACCESSORIES

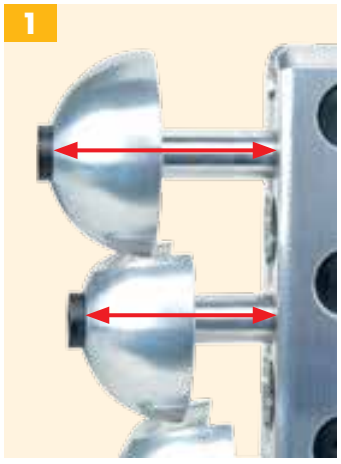
1 Aluminum butt plate PRECISE

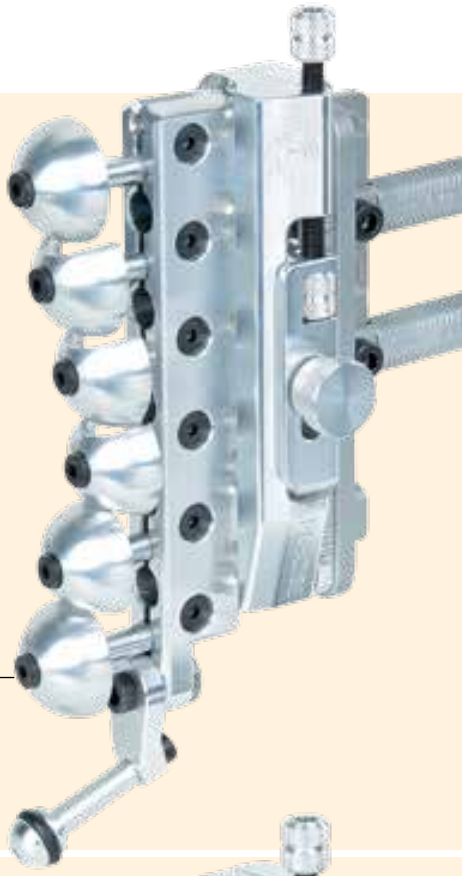
Air rifle shooters who prefer slim hook butts will embrace this product. 6 stop-pins, adjustable in length, on the vertical axle of the hook butt can be adjusted individually to the shoulder's size and form. These adjustments are easily done and require no special technical knowledge. Rubber heads on the pins improve the hold. These rubber heads are not glued but can be removed without difficulty. If this is not wanted they can be fixed with super glue.

Lateral screwed clamping plates fix and secure the pins in their adjusted position. A guide rail with integrated fast clamping secures and fixes the adjustment in height and depth without using tools. An additional adjustment screw allows a very accurate fine-tuning of the height while in position. This ensures repeated precise positioning and managing of the rifle.

The ahg-hook butt plate PRECISE can be mounted to any current match rifle.

Item No.: 5010



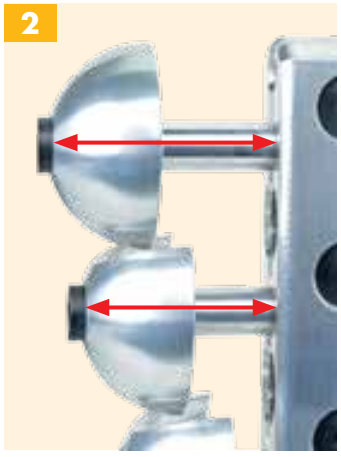


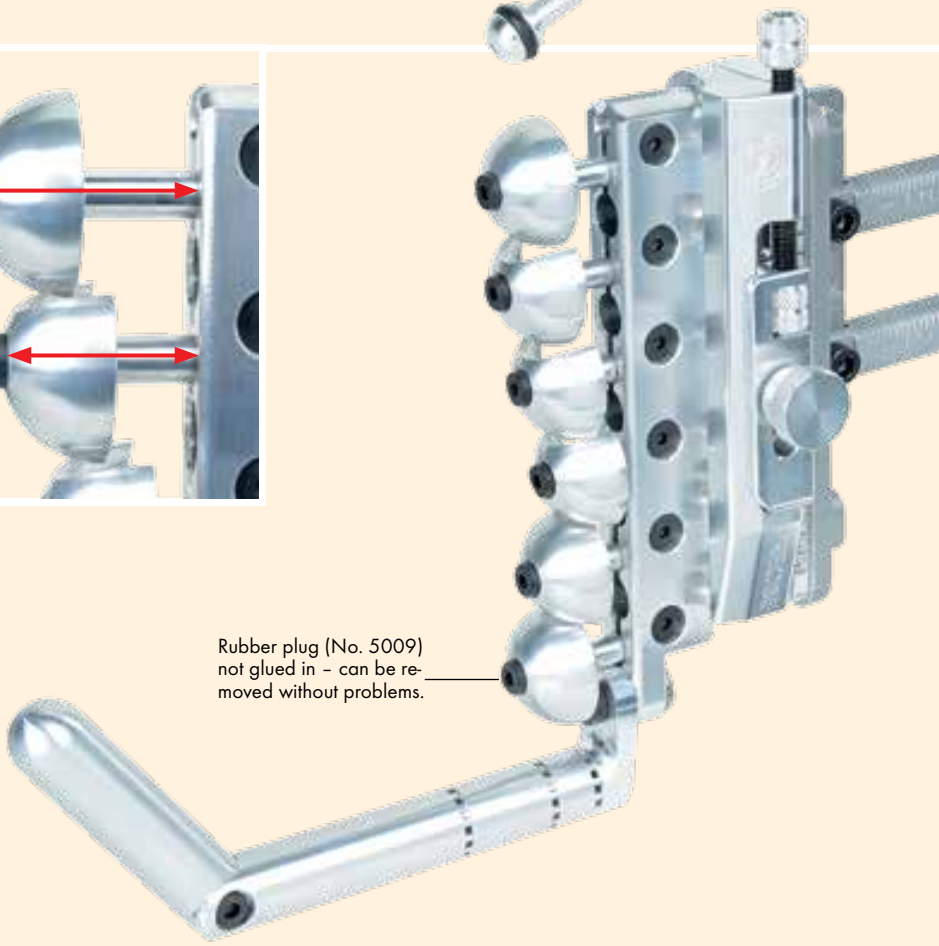
2 Aluminum hook butt plate PRECISE

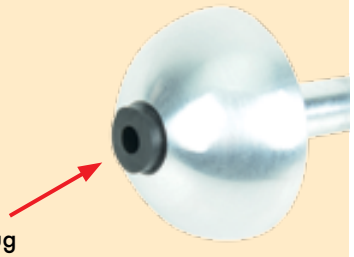
3 position shooters who prefer slim hook butts will embrace this product. 6 stop-pins, adjustable in length, on the vertical axle of the hook butt can be adjusted individually to the shoulder's size and form. These adjustments are easily done and require no special technical knowledge. Rubber heads on the pins improve the hold.These rubber heads are not glued but can be removed without difficulty. If this is not wanted they can be fixed with super glue. Lateral screwed clamping plates fix and secure the pins in their adjusted position.

A guide rail with integrated fast clamping secures and fixes the adjustment in height and depth without using tools. An additional adjustment screw allows a very accurate fine-tuning of the height while in position. This ensures repeated precise positioning and managing of the rifle. A 5 -part adjustable hook, which may be fitted for smallbore and large-bore disciplines, completes the ergonomic adjustment possibilities of the butt plate.

Item No.: 5012

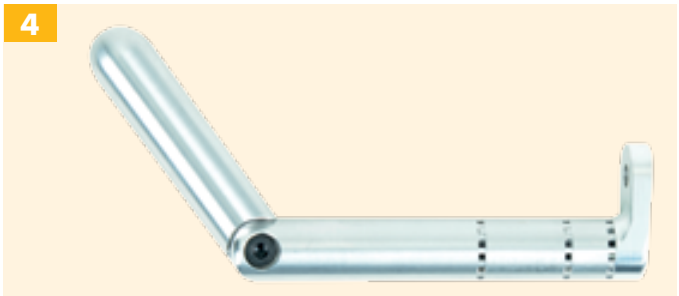






3 Rubber plug

Item No.: 5009

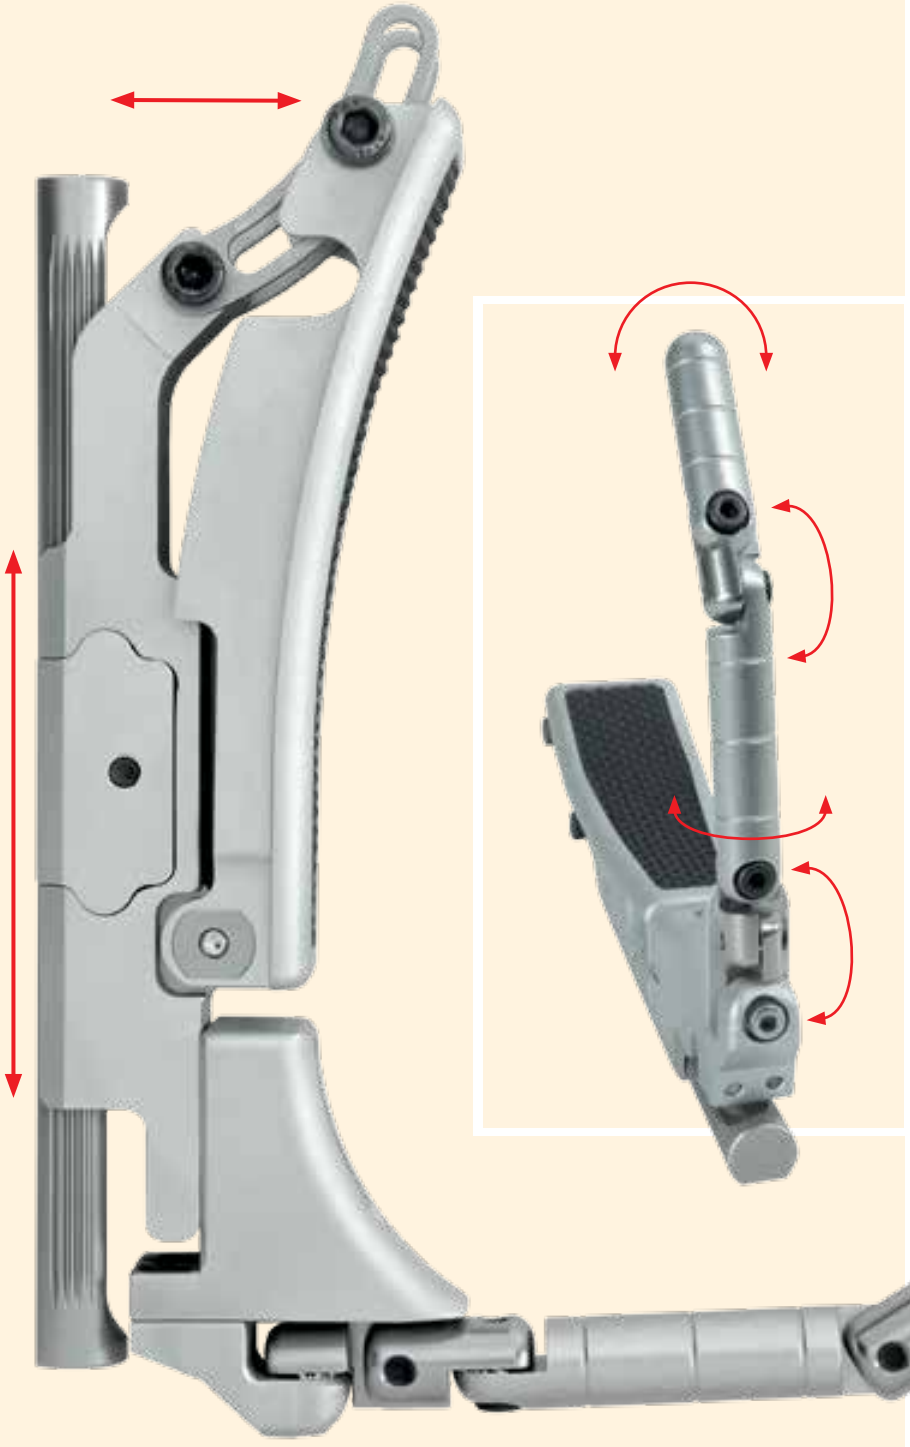


4 Adjustable hook

For PRECISE aluminium butt plates.

Item No.: 5006

5



5 Hook butt plate RETRO

The Anschütz hook butt RETRO mod. 4762 is a very well-known accessory for rifle shooters. Due to the demand from shooters, we have revived it with new design in technique and material. This product is 100% made in Germany and extremely strong and supreme in small and big bore shooting. Fine adjustment of the incline results in a perfect fit to the shoulder. A highlight is the new construction of the hook. It allows the pure sideways swap of the hook which results in a perfect positioning of the rear stock vertically underneath the shooter's head. The essential advantage is shown at the moment of the shot: distinctly more control and a more constant diversion of the recoil of the rifle. The rubberized contact area offers best grip between shoulder and hook butt avoiding sliding. This simple but thought-out hook butt impresses by inter-coordinated materials, not only in appearance but also in function and practice.

Item No.: 4762

MEC ACCESSORIES

1 MEC "TRIGGER" TRIGGER SHOE

- Can be tilted to the side.
- Blade can be moved freely.
- Longitudinal grooves for secure grip.
- Optimum width.
- Variable rings for sensing height.
- Light aluminium construction for function and stable fixing.

Item No.: 9906 (for Anschütz)
Item No.: 9907 (for FWB)
Item No.: 9908 (for Walther)

2 MEC "CONTACT III"

Aluminium butt plate.

- Continuous adjustment to any shooting position.
- Very good grip.
- Fits all current air rifles.

Item No.: 9903

3 MEC "FREE POSITION"

Butt plate for super match and sport rifles.

- Unsurpassed range of adjustments.
- Wing elements can be adjusted in height and angle and can be rotated about the axis.
- Suitable for all current small-bore match rifles.

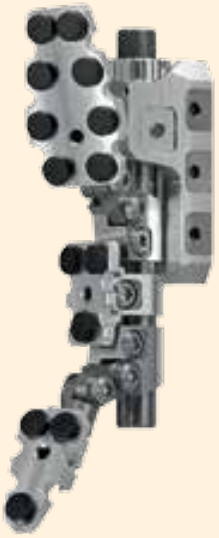
Item No.: 9904

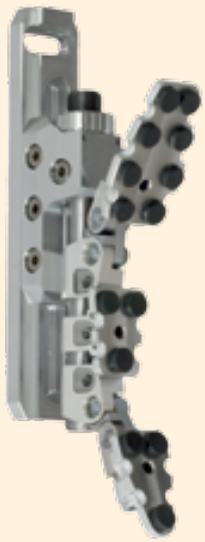
4 MEC „CONTACT IV"

The classic has been modified to fit the new generation.

- A hand adjustable screw enables vernier height adjustment.
- Additional joints alow for variable adjustments.
- Wing forms are exchangeable.
- Wings are fully adjustable and revolvable.
- The natural uncured rubber knops allow for perfect grip.
- Compatible with all comon match rifles.
- Suitable for the following disciplines: offhand air rifle, 3-position and shooting air rifle off a rest.

Item No.: 9913





5 MEC HAND STOP

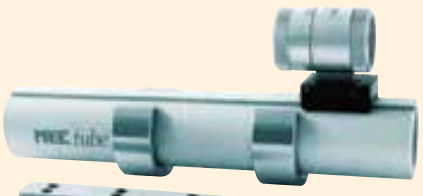
- Can be moved to the side, i.e. the hand can be individually positioned on the stock.
- Variable height. The height can be adjusted to suit the anatomy of a particular hand by using spacers.
- The special shape minimises pain.
- There are two options for attaching the sling swivel: the sling pull can come from the centre (fixed to the knurled screw) or it can come proportional to the lateral offset, not from the centre (fixed to the "bobbin").
- Scaling of the lateral offset.

Item No.: 6227

6 MEC "TUBE"

- Sighting line extension for air rifles.
- Extends the sighting line to the maximum.
- Continuous adjustment of the sighting line.
- Variation of the weight and the balance.
- Reduction of recoil.

Item No.: 9900 (for Anschütz)
Item No.: 9901 (for FWB)
Item No.: 9902 (for Walther)



7 MEC "VISOR"

- Neoprene eyeshield.
- Lightweight shielding from scattered light.
- Can be shaped as desired.

Item No.: 9905

8 Palm rest - CHAMPION

- Adjustable in all directions.
- Exchangeable hand rest.
- Hand rest swings radially about the centre line of the barrel.

Item No.: 9910

9

9 Safety Cord - SIGNAL LINE

Some time ago the safety regulations for shooting ranges were tightened to the effect that the state of an unloaded sporting weapon must be clearly visible. As of now, ahg is offering the SIGNAL LINE safety cord (approved by the DSB), which can be used with all calibres. The red signal cord is passed through the chamber into the barrel of the rifle or pistol and pulled through the muzzle, thus indicating that the firearm cannot be loaded.
We supply the safety cord in individual packs of 1 m, and also in packs of 10 m, so that you can cut up the cord yourself.

Item No.: 1400 (1 m)
Item No.: 1401 (10 m)

10 SECURITY KEYED gun lock

Secures your firearm from unauthorised use.
Suitable for all rifles.

CAUTION:
Fit only to an unloaded rifle.
Always store firearms in an unloaded condition!

Item No.: 001588

10

11

11 BOLT PROTECTOR

The BOLT PROTECTOR is made of special plastic and protects the bolt during transport from damage and dirt that could cause malfunctions.
For safety reasons, the bolt should always be transported separately and unlocked from the rifle. Most transport companies, including airlines, already stipulate by law the separate transport of rifle and bolt.
The ahg Bolt Protector has been developed to protect the bolt from damage and malfunctions while being transported separately.
The ahg BOLT PROTECTOR consists of a plastic sleeve with an integral guide for the bolt and a removable aluminium cap for easy cleaning of the sleeve. The bolt is inserted into the protector in the cocked state and positioned on the guide at the same time. Turning the bolt handle locks the bolt in the protector and automatically uncocks the firing pin or the firing pin spring.

For all Anschütz match rifles, Models 1407–2013

Item No.: 1322
Item No.: 1322-L (left-handed version)

12

12 SAFETY LOOK

Safety first!
- Plastic cartridge with signal flag.
- Indicates that there is no live cartridge in the chamber.
- Prevents cooling of the barrel.

Available in the following calibres:

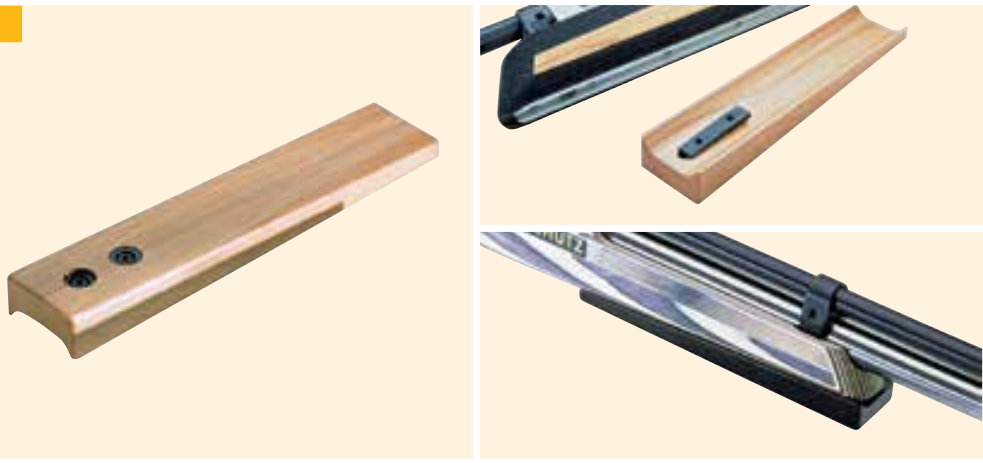
Item No.: 1300	Safety look for cal. .22 l.r.
Item No.: 1301	Safety look for air rifles and pistols
Item No.: 1302	Safety look for cal. .32
Item No.: 1303	Safety look for cal. .38 / .357
Item No.: 1304	Safety look for cal. .44
Item No.: 1305	Safety look for cal. .45
Item No.: 1306	Safety look for cal. 6 mm BR / .308 Win. / 30.06
Item No.: 1307	Safety look for cal. 6.5 x 5.5
Item No.: 1308	Safety look for cal. 8 x 57
Item No.: 1309	Safety look for cal. 7.5 x 55
Item No.: 1310	Safety look for pellet cal. 12
Item No.: 1311	Safety look for cal. 9 mm para

BENCH REST ACCESSORIES

1 BENCH REST WEDGE

For Anschütz and FWB air rifles with a sloping fore-end. Simply push it into the aluminum swivel rail and screw tight.

Item No.: 1005 (hardwood)
Item No.: 1006 (black hardwood)



2 Bench rest wedge - CONTACT

Due to its weight and the 2-point contact on the contact surface, the 'Contact' aluminum bench rest wedge prevents any shaking and sliding of the rifle. The Softlink suspension, known from the Anschütz 9003 air rifle, also reduces the recoil from your sporting rifle. This is especially noticeable in the small bore disciplines.

Dimensions: L = 340 mm, W = 58 mm, H = 14 mm

Weight: 350 g

Item No.: 1023 (silver)
Item No.: 1023-S (black)

3 ANGLE PLATE for the CONTACT bench rest wedge

Some bench rest shooters prefer to tilt the rifle in the shooting position to achieve better seating of the butt plate in the shoulder area.
To enable this individual fine tuning the ahg angle plate, Item 1024 has been developed as an additional accessory for the bench rest wedge, Item 1023.
When the aluminium angle plate is used, the rifle is tilted on the bench rest by 10° along the axis of firing and guarantees the shooter a tension-free, precisely repeatable shooting position. Additionally machined transverse slots allow the centre of gravity of the rifle to be positioned exactly over the centre of the bench rest wedge.

Weight: 204 g, Angle of tilt: 10°

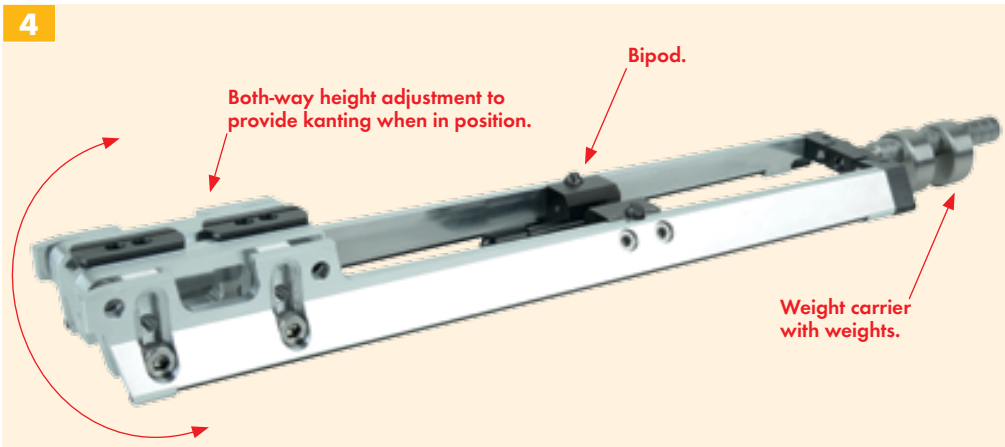
Item No.: 1024 (Illustration with 1023-S)

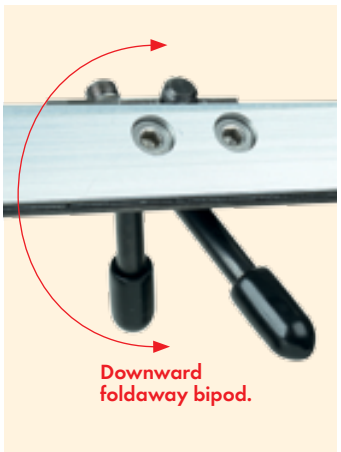
4 Benchrest Slide ahg-MAX 300

The ahg-MAX 300 benchrest slide combines in stages tilted benchrest adjustments up to max 15° and additionally infinite angle length adjustments up to max 12°. The toothed profile of the rail and carrier with 4 screws on either side guarantee a parallel and solid guidance.The 3-piece front connecting joint locks both rails in parallel or tilted position. A stabilizing bar (40 g) with 2 weight rings (30 g ea.) corrects the overall balance point of the rifle. Non-slip rods at the bottom of both rails secure a high resting stability of the gun.The benchrest slide ahg-MAX 300 is mounted onto the forend stock by sliding 2 slot nuts into the stock rail. The integrated supporting legs can be used as bi-pods.

- Inclination/tilting max approx. 15°
- Inclination of the vertical rail max approx. 12°
- Resting width 60 mm
- Suitable for guns with T-nut
- Adjustable in length
- Simple mounting
- Total weight approx. 450 g

Item No.: 1027





BENCH REST ACCESSORIES

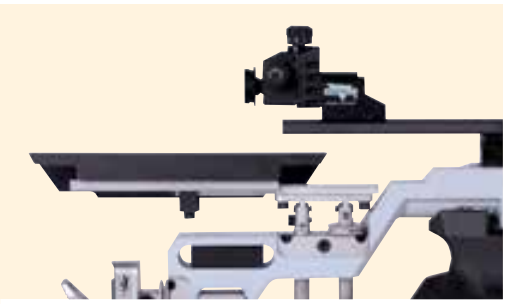
5

5 Aluminium bench rest rail - MAGNUM

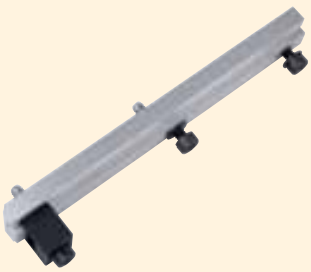
The Magnum aluminium bench rest rail allows the rifle to be tilted continuously on the bench rest in order to achieve a tension-free and precisely repeatable shooting position at the shoulder.
A radially adjustable rail on each side enables the rifle to be tilted at angles up to 20°. Specially arranged axles on the base rail guarantee 2-point contact on the bench rest surface. The Softlink bearings in the base rail minimise the recoil of the rifle, especially in small-bore disciplines.

Weight: 555 g
Length: 26 cm

Item No.: 1026



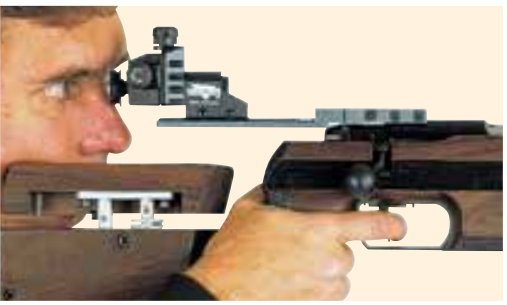
6



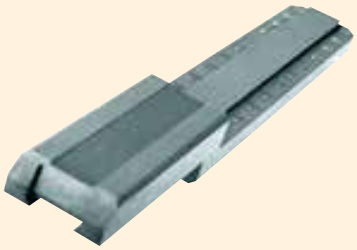
6 ADJUSTING RAIL for a cheek piece

To optimise the shooting position, especially when bench rest shooting, the sturdy and continuously adjustable (towards the back, up to 13 cm) mechanism is fitted to the original ANSCHÜTZ cheek piece adjustment (2213-8200). The continuous adjustment range enables the shooter to find his optimum head position. The backwards adjustable cheek piece thus offers a stable, repeatable shooting position. Neck and throat muscles are relieved. None of the previous functions of the cheek piece settings are affected and they can be adjusted as usual. Suitable for all Anschütz rifles that are fitted with the 2213-8200 cheek piece adjuster.

Item No.: 1025



7



7 Rear sight rail - TELE

To move the rear sight back for bench rest shooting.

Item No.: 1003 (for Anschütz rifle)
Item No.: 1004 (For FWB rifles)

8

8 EAR SIGHT TUBE

To move rear sight iris apertures back:
The ahg rear sight tube is available in 30 and 50 mm lengths. They can be screwed into any standard rear sight and thus extend the iris to the rear so that the shooter can adopt a more comfortable, relaxed head posture when bench rest shooting. Because they are threaded, the individual tubes can also be combined with one another to produce various length combinations.

Item No.: 9773-30 (30 mm)
Item No.: 9773-50 (50 mm)

9

9 SIGHTING LINE EXTENSION for bench rest shooting

An optimum combination of sighting line extension and raiser block, specially developed for bench rest shooting. The benchrest shooter looks through the sight set in a completely different way.
Due to the displacement to the rear and upwards it is possible to adapt to the different shooting positions without compromise. 200 mm

For Models 1907, 8002 and later.
Item No.: 007065

For Models 1407–1813 (not shown)
Item No.: 008551

BENCHREST

1 BR 50 BENCHREST STOCK

For square and round ANSCHÜTZ actions. ANSCHÜTZ has developed a non-stained stock with a very wide, flat for-end especially for "bench rest" shooting.

Material: natural walnut.

Suitable for all square 2013 and 2007 barrelled actions
Item No.: BR50-U1

Suitable for all round 1913 and 1907 barrelled actions
Item No.: BR50-U2

2 BR 50 BENCHREST STOCK

Suitable for all square 2013 and 2007 barrelled actions
Item No.: BR50-U6

Suitable for all round 1913 and 1907 barrelled actions
Item No.: BR50-U7

3 Bench rest stock - AS 300

A stock designed for small bore bench rest shooting with a low lying centre of gravity.

- Aluminium butt plate adjustable in length (Item 5012).
- Finely adjustable cheek piece.
- Recoil-damping concave aluminium bench rest wedge (Item 1023).
- Can be used with Anschütz Match 54 actions with round receivers.
- Models 1407–1413, 1807–1813, 1907–1913.

Length-adjustable walnut thumbhole stock with Precise butt plate for accurate adjustment of the butt plate in the shooting position.

Vertically adjustable Precise cheek piece with fine adjustment, horizontal micrometer adjustment with up to approx. 40 mm backward displacement of the cheek piece.

Sequentially engraved scales guarantee non-interchangeable repetition of the desired settings.

The cheek piece settings can be adjusted without tools while in the shooting position.

The long fore-end with integrated CONTACT bench rest wedge features the wide two-point rest and Softlink recoil damping.

The ahg angle plate (Item 1024) can also be fitted optionally.

Overall length: approx. 880 mm–920 mm

Weight: approx. 2500 g

Item No.: AS-300 (1407–1913)
Item No.: AS-300-U2
(with rubber butt plate 1407-1913)
Item No.: AS-300-U3 (2007-2013)
Item No.: AS-300-U4
(with rubber butt plate 2007-2013)

5 MENTAL TRAINING IN SHOOTING

Over 144 pages, successful coach Anne-Grethe Jeppesen and psychologist Anne Marte Pensgaard explain the importance of mental strength during competition and give advice on how to acquire it. The book is only available in English.

Item No.: 9915E (English)

6 LUFTGEWEHR-SCHIESSEN (AIR RIFLE SHOOTING)

Reference book for shooters.

Item No.: 9912 (German)
Item No.: 9912E (English)

7 WEGE DES GEWEHRS (WAYS OF THE RIFLE)

Reference book for shooters. Volume 1.

Item No.: 9911 (German)
Item No.: 9911E (English)

8 PISTOL SHOOTING

Reference book for pistol shooters.

Item No.: 9916E (English)

9 THE PSYCHE OF A SHOT

Sport psychology and competition.

Item No.: 9916E (English)

10 ANSCHÜTZ Büchsenmacher seit Jahrhunderten (Gunsmiths for Centuries)

An exciting documentation especially for weapon experts, hunters, marksmen and shooting sportsmen, illustrated with nearly 200 photographs, pictures of historic weapons and unique contemporary documents. 170 pages.

Item No.: 009115 (German)

11 COMPRESSED AIR HAND PUMP with Pressure Gauge

For easy filling of compressed air cylinders for rifles or pistols.

Item No. 8300
Item No. 8301 (with dry air filter unit)

MEASURING

1 OVERLAP MEASURING DEVICE

Conforms to ISSF Rule 7.4.7.8.2

Item No.: 572

2 SHOE MEASURING DEVICE

Conforms to ISSF Rule 7.4.7.3.4.1

Item No.: 575

3 TRIGGER PRESSURE GAUGE

- For measuring the magnitude and constancy of the trigger resistance.
- All gauges are fitted with a weight pointer and a drag pointer which indicates the release weight of the trigger.

Trigger pressure gauge:	Setting range:
Item No.: 540	5 – 50 g
Item No.: 541	25 – 250 g
Item No.: 542	50 – 500 g
Item No.: 543	200 – 2000 g

4 VELOCIMETER

- For compressed air rifles and pistols.
- Ideal for coaches to check the speed of the sports air rifle.

Item No.: 547

5 PISTOL BOX

For all current air pistols. Conforms to ISSF Rule 8.1.6.0
Dimensions: 420 x 200 x 50 mm
Item No.: 570

For sports pistols. Conforms to ISSF Rule 8.1.6.0
Dimensions: 300 x 150 x 50 mm
Item No.: 571

6 THICKNESS GAUGE

Conforms to ISSF Rule 7.4.7.7.1.1

Item No.: 573

7 THICKNESS AND RIGIDITY GAUGE

This new measuring device can measure the thickness as well as the rigidity of your shooting garments. Supplied with case.
Conforms to ISSF Rule 7.4.7.7.2.2

Item No.: 548

8 TRIGGER TESTING WEIGHT

- Comprising 4 parts. Air pistol 500 g, standard pistol 1000 g and target pistol 1360 g can be checked with one gauge.
- Spring pre-loaded for smooth measurement.
- Includes 140 g replacement weight and wooden case.

Item No.: 545

9 SCORING GAUGE

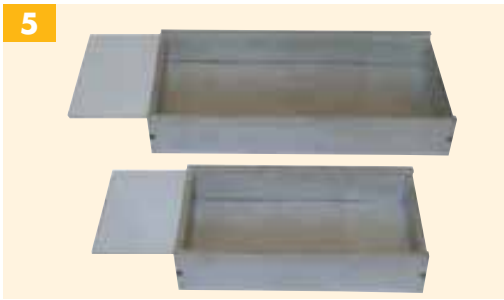
Available in calibres .177 for air pistol and air rifle, and .22l.r., .32 and .38. The scoring gauge is supplied with or without magnifier.

Item No.: 550 .177 air rifle with magnifier
Item No.: 551 .177 air pistol with magnifier
Item No.: 552 .22 l.r. with magnifier
Item No.: 553 .32 with magnifier
Item No.: 554 .38 with magnifier
Item No.: 556 .177 air rifle
Item No.: 557 .177 air pistol
Item No.: 558 .22 l.r.
Item No.: 559 .32
Item No.: 560 .38

10 SCORING GAUGE SET

Consisting of 7 different gauges in calibres .177, .22, .32, .38 and .45, as well as negative gauges for air rifle and air pistol.

Item No.: 562



11 SCORING GAUGE SET Large with magnifier

Consisting of 14 different gauges with and without magnifier in calibres .177, .22, .32, .38 and .45, as well as negative gauges for air rifle and air pistol.

Item No.: 561

12 Sole stiffness measuring device

Conforms to ISSF Rule 7.4.6.7.6.

Item No.: 576

13 Compressor PT100 TW

Mobile and versatile in application

- Whether as a breathing air compressor for diving groups, fire brigades and on ships, or for filling cartridges for competition marksmen, the possible applications of the PE 100 are almost unlimited.
- Due to its low weight, compact design and small dimensions, the PE 100 TW is easy to transport and fits comfortably into almost any car trunk.

The compressor block of the PE 100 TW is manufactured by BAUER. Over 50,000 examples of this model have been sold over the last 15 years and perform their task worldwide with their legendary reliability.

The sophisticated technology makes particularly long maintenance intervals possible. This is easy on the purse and helps to limit the annoying shutdown times of the compressor during necessary service works to a minimum.

Preassure: 225 bar
Charging rate: 100l/min
Drive: single-phase 220V
Purification system: P11
Weight: 44 kg
L x W x H: 780 x 340 x 420 mm
capacity: about 3 x 10-liter bottles 200 bar in one hour

FILLING DEVICE FOR PE 100 - TW SHOOTING VERSION

Consisting of:

- 1 filling hose, length 1m,
- 1 filling valve and final pressure gauge,
- 1 adaptor 2x5/8" for connection of cartridge adapter, suitable for all manufacturing brands

Item No.: PT100 TW

14 BAUER Junior Compressor

Robustness and reliability have made the JUNIOR II a worldwide classic and a genuine best seller, with over 30,000 systems sold. The patented TRIPLEX® filter system guarantees the purest breathing air according to the breathing air standard, DIN EN 12021.

AC 220 V
Weight: 46 kg
L x W x H: 660 x 360 x 420 mm
Delivery rate: 100 l/ min
Motor power: 2.2 kW
Speed: 2300 rpm
Filling time 2 min. for 12 l bottles

Item No.: JuniorII

15 SCATT USB PROFESSIONAL Aiming Point Imaging

Computer-controlled aiming point imaging (infrared system) for almost all sports rifles and pistols.
For home training (dry) and live shooting with compressed air. Materials supplied:

- Measurement frame with insert for air rifle target.
- Cable for connecting to PC (also supplies power).
- Processor with connecting cable.
- Sensor (only 30 g approx.) with connecting cable and 5 tie straps for all barrel diameters.
- Program on CD, manual & installation instructions.

The most fully developed aiming point method for professional demands:

- Exact measurement from 4–12 meters, simple operation.
- Clear menu guide, easy calibration.
- USB interface.
- Windows menu control, comprehensive file management.
- Programs for all ISSF competitions - rifle, pistol, bow.
- Diverse analysis options.
- On-line Help and Update.
- For public relations.
- For all performance classes.
- For professional training.

Minimum requirements:
IBM-compatible PC, processor 350 MHz or faster, 32 MB RAM, CD-ROM drive, SVGA monitor (800 x 600, 16 bit colour), 2 USB ports. Windows: 98, 2000, Me, XP, VISTA 32bit.
Internet Explorer 4.01 or higher.

Item No.: Scatt-USB
Item No.: Scatt-Wireless

16 Scoring Machine RM-IV

Detects the target type and discipline automatically and prints out the result in tenth or full rings.

Item No.: RM-IV

17 SCATT MX02

An electronic computer trainer. Intended for shooting practice with fixed targets. The unique feature of this system is the ability to train either in the dry fire mode or in live fire. The trainer is also designed to be used both indoors and at open shooting ranges. You will be able to train by simply using a paper target or a standard target installation (i.e. SIUS). In live fire training you don't have to worry anymore about damaging the expensive device

Delivery volume:
Optical Sensor MX-02ready for 10, 25 and 50 meter, mounting kit for the optical sensor, optical sensor's interface cable.

Item No.: SCATT MX-02

GUN CARE

1 Carbon cleaning rod

This carbon cleaning rod is distinguished by qualities such as tensile strength, rigidity, flexibility and corrosion resistance.
Damage to chamber or barrel by bending of the rod is almost impossible.
The lightweight carbon rod is inserted free of play with axial ball bearings, specially designed for this application, in the handle so that friction is greatly reduced. The cleaning material thus follows exactly the barrel's profile (land and rifling).

Technical data
Ø 5 mm single piece, wiping length 900 mm, for cal. .22 l.r. to 6,5 mm, external thread 1/8".

The carbon cleaning rod is supplied with cleaning set Item. 581.

Item No.: 580

Brush Cleaning Set

Consisting of:
Brass spike for cotton patches, woollen swab and feather brush for cal. .22 l.r. Internal thread 1/8".

Item No.: 581

2 Cleaning accessories for cleaning rod

Adapter for internal thread 1/8" to 8x32.
Item No.: 586

Brass spike for 1" cotton patches, suitable for cal. .22 l.r., internal thread 1/8".
Item No.: 582

Spring brush in pack of 3, suitable for cal. .22 l.r., internal thread 1/8". The special spring brush adapts to the internal profile of the barrel, follows the twist of the barrel exactly and removes bullet and powder residues.
Item No.: 584

Brass brush in pack of 3, suitable for cal. .22 l.r., internal thread 1/8".
Item No.: 585

Woollen swab in pack of 3, suitable for cal. .22 l.r., internal thread 1/8".
Item No.: 583

3 Bore Tips

The Swab-Its Bore-Tips Cleaning Swabs are unique foam swabs that are just the thing for giving your barrel a good cleaning. By utilizing a polyurathane foam molded over a polymer jag the Bore-Tips achieve a very tight fit in the bore. Additionally, Bore-Tips can be washed with soap and water and reused. The molded thread fits tightly and securely in to cleaning rods and can be removed and used again and again with no damage to the threads.

For rods with different thread you have to use an adapter like item no. 586

Bore-Tips are available for several calibers and because they are foam and not cotton, they leave no fuzz or fibers behind. Also, because the foam swab is sponge-like it absorbs solvent and lube with less mess and makes complete contact with bore when passing through which ensures a completely coated bore.

Technical information:

- Swab Material: Polyurathane Foam
- Jag Material: Polypropylene Plastic
- Thread: 8/32"

Item No.: 590 cal. .22
Item No.: 591 cal. .243
Item No.: 592 cal. .30 / 7,62 mm
Item No.: 593 cal. .357 / 9 mm
Item No.: 594 cal. .40 / 10 mm
Item No.: 595 cal. .45

4 Fluna Tec TFT optical foam cleaner

Fluna Tec TFT optical foam cleaner is a special foam for cleaning of hunting opticals, computer screens, cell phones, spectacles, laptops as well as various glass and plastic surfaces.

Properties:

- Special cleaning foam.
- Long lasting.
- Antistatic in use.
- Extremely high stability.
- High cleaning power.
- Does not penetrate the casing.
- Cleans without residues or streaking.
- Does not contain alcohol.
- Easy to use.
- 100 ml aerosol can

Item No.: 566

5 GUN CLEANING SET 1

- ANSCHÜTZ Gun Coating 100 ml Aerosol
- Fluna Gun Cleaner 50 ml
- Fluna Gun Degreaser 100 ml liquid
- Microfibre towel, size 40/40 cm
- Inlet with Product-description
- Plastic packaging, size DN 7 cm / H= 34 cm, incl. unscrewable cap with hanging loop. Foam Material at the bottom of the package.

Item No.: 569 (Aerosol)
Item No.: 569-L (liquid)

6 ANSCHÜTZ ceramic coating

ANSCHÜTZ Keramik Coat is a heavy-duty ceramic coating for all types of firearms and knives.

Despite its excellent lubricating properties, ANSCHÜTZ Keramik Coat is residue free; it forms an invisible film on the firearm:
Its structure bonds firmly with the treated surface and provides long-lasting protection against corrosion, while the ceramic structures give the firearm a highly polished appearance. The functionality is maintained and the shooting precision can be improved by polishing the barrel profile. ANSCHÜTZ Keramik Coat works on metal and plastic. Right from the first treatment - even with older firearms.

- Residue-free, non-greasy coating.
- Prevents dust from accumulating.
- Long lasting effect.
- Economical in use.
- Salt and fresh water resistant.
- High temperature resistant from 40 °C to +750 °C.
- Cleaning of the firearm is made easy.

7 SIGHT DARKENER - BLACK MATCH

To remove reflections from the front sight, rear sight and barrel.

- Just use it like a lighter: Light it and blacken the desired parts.

Item No.: 523

8 CLEANING SET

The cotton wicks are pushed into the grooves in the barrel and remove all powder and dirt residues.

- No removal of the bolt required.
- For rifles and pistols.
- Tear resistant up to 60 kg.
- For all calibres, including air rifles.
- Very light and fits anywhere.
- Cleans simply and thoroughly just by pulling.
- No more screwing together necessary.

Item No.: 507

9 COTTON WICKS

Refill pack for Item No. 507.

- 32 cotton wicks for rifles and pistols.

Item No.: 508

10 CLEANING ROD

For cleaning rifles and pistols.

- Cleaning rod (86 cm) with rubber coating for cleaning pads and cleaning brushes.
- For 4,5 mm and .22 l.r. caliber.
- Includes brushes for 4,5 mm and .22 l.r. caliber.

Item No.: 505

11 Cotton flannel patches

Lint-free, 1" round patches made from 100% cotton flannel, suitable for cal. 22 l.r., 500 pcs.

Item No.: 504

12 COTTON PADS

Lint-free 1 1/4" pads made from 100% cotton.
Contents: 100 pcs.

Item No.: 503

13 CLEANING PATCH

Refill pack for Item No. 505.

- 50 Cleaning patches.
- For optimum gun care.
- Absorbent and lint free.

Item No.: 506

14 VFG CLEANING PROGRAMME

The complete programme for the careful cleaning of your sports equipment.

(6) **FAST CLEANING PATCHES**
For air rifles and air pistols, 4,5 mm calibre, box of 100.
Item No.: 514

(7) **SUPERINTENSIVE CLEANING PATCHES**
Calibre 4 – 4,5 mm, box of 100.
Item No.: 513

(8) **SUPERINTENSIVE CLEANING PATCHES**
Calibre .58, special felt with brass fibres, box of 25.
Item No.: 534

(9) **FAST CLEANING PATCHES**
For air rifles and air pistols, 4,5 mm calibre, box of 500.
Item No.: 515

(10) **BARREL CLEANER for rifles**
Calibre 4 – 4,5 mm, box of 100.
Item No.: 516

(11) **BARREL CLEANING PASTE**
Polishes, restores and conserves, approx. 60 g.
Item No.: 511

(12) **LUPUS Teflon Grease**
approx. 50 g

Item No.: 526	50 Barrel cleaner cal. 7,5 mm
Item No.: 527	50 Barrel cleaner cal. 8 mm
Item No.: 528	50 Barrel cleaner cal. 9,3 mm

(2) **BARREL CLEANER for rifles**
Calibre .22 l.r., bag of 500.
Item No.: 520

(3) **SUPERINTENSIVE CLEANER**
Calibre .22 l.r., box of 80.
Item No.: 521

(4) **CLEANING ROD**
One piece for calibre .22 l.r. – 6,5 mm.
Item No.: 530

(5) **ADAPTER for cleaning rod 530**
Item No.: 531

AMMUNITION BOXES AND AMMUNITION

1 AMMUNITION BOX

The SB-200 ammunition box for .22 l.r., .17 Mach 2 and .17 HMR has been developed to facilitate removal of the ammunition in sports shooting. It is especially suitable for low temperatures, when the fingers tend to stiffen. The box has a capacity of 100 cartridges plus 2 cartons which fit in the middle.
Dimensions: 22 x 11 x 5 cm

Item No.: 269

2 SAFETY BOX

Safety-Box for pellet tins. The annoying problem of attaching and removing the adhesive tape from the tins is now over. The tin is simply put in the Safety Box and is ready for use.

Item No.: 2101

3 PELLET BOX

The secure competition packaging.
- Simple to fill and easy to take out.
- Suitable for 4,5 mm (.177) calibre.
- For 100 Diabolo pellets.

Item No.: 1001

4 PELLET WOK

Using the PELLET WOK simplifies picking up the individual pellets from the tin to load the rifle. The special plastic ahg Pellet Wok is inserted in the original ammunition tin and filled with approx. 100 pellets. Due to the special shape of the Woks, the individual pellets are protected from deformation when they are being handled.

Item No.: 2105

5 SPORT PELLETS

Sport pellets for air rifle or air pistol, made by H+N.
- Only available in 4,5 mm calibre.
- For air rifle and air pistol.
- Tin with 500 pellets.

Item No.: 2103

6 MATCH PELLETS

Target pellets for air rifle and air pistol, made by H&N.
- Available in 4,5 mm calibre.
- For air rifle and air pistol.
- Tin with 500 pellets.

Item No.: 2102

7 FINALE MATCH PELLETS

Finale target pellets for air rifle and air pistol, made by H&N.
- Available in sizes 4,48 / 4,49 and 4,5 mm.
- For air rifle and air pistol.
- Tin with 500 pellets.

Item No.: 2100

8 Qiang Yuan pellets

Qiang Yuan pellets win over due to their exceptional precision.
Available in size 4,5 mm und 4,49 mm / cal. .177
Weight: 0,53 g / 8,2 gr

Packed individually in a competition plastic box of 200 pcs.

Item No.: 2104

Item No.: 2104

Round plastic box with 500 pellets.

Item No.: 2106

Item No.: 2106

9 SAFETY BOX

Safety-Box for Qiang Yuan pellets. The annoying problem of attaching and removing the adhesive tape from the tins is now over. The tin is simply put in the Safety Box and is ready for use.

Item No.: 2107

- In 3-D embossed technology. With key ring.

Item No.: 2007

18 ahg PIN

- Diameter 15 mm. With butterfly fastener.
- Soft enamel, stamped iron.
- With ahg-Anschütz logo motif.

Item No.: 2001

19 LANYARD KEY FOB

- ANSCHÜTZ Design.
- Quick separation of key fob and strap.
- Includes aluminium box.

Item No.: 2010

EAR AND EYE PROTECTION

1 Custom Molded Earplugs, DO-IT-YOURSELF KIT

- Molds in 10 minutes
- Soft, permanent, custom fit for all day comfort
- Safe, Non-toxic and Hypo-allergenic
- Long lasting and washable
- Simple, easy to follow instructions (Video)
- NRR 26 dB

Item No.: 309

2 PELTOR POCKET HEARING PROTECTORS

The slim design of the ear cups is particularly well suited to sports shooters:

- Very light (approx. 180 g).
- Comfortable fit.
- No impediment in the shooting position.
- Amazingly good sound damping properties.
- Continuously adjustable.

Item No.: 313

3 TPOCKET HEARING PROTECTORS

A product specially developed for shooters from a sound-insulating perspective:

- Very light (approx. 196 g).
- Foldable.
- Wide, soft sealing rings.
- No impediment in the shooting position.
- Comfortable fit.

SNR	H	M	L

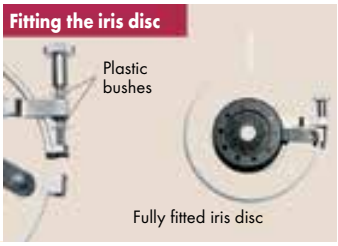
Fitting the iris disc



Practical design, simple handling and outstanding stability are the basic qualities of shooting glasses in the ahg range.

JÄGGI NOVA Shooting Glasses

Meet all these expectations in their conceptual design and furthermore offer a sensibly put together range of accessories which guarantees optimum conditions for all shooters even with strong visual defects and under extreme light conditions at the range.
With one model it is possible to shoot with rifle, pistol or with open sights by simply and quickly changing the lens frame - without a tool.
The square guide on the frame and glass holder prevent the lens ring from unintentional movement or adjustment while shooting.
The Jäggi Nova shooting glasses are supplied in a small, handy case for protection.

9 SHOOTING GLASSES

Shooting glasses for **rifle** with 42 mm lens frame , bent legs (39 g light), frame length 160 mm, with fold-up eye shield in a small case.

Item No.: 9000-42 (for right-handed shooters)
Item No.: 9001-42 (for left-handed shooters)

Shooting glasses as above + 31 mm lens frame.
Item No.: 9000-31 (for right-handed shooters)
Item No.: 9001-31 (for left-handed shooters)

Shooting glasses as above + 25 mm lens frame.
Item No.: 9000-25 (for right-handed shooters)
Item No.: 9001-25 (for left-handed shooters)

Shooting glasses for **pistol** with 42 mm lens frame, straight legs (39 g light) frame length 160 mm, with fold-up eye shield in a small case.

Item No.: 9002-42 (for right-handed shooters)

Item No.: 9016-31
Item No.: 9018-42

13 EYESHADE

For right and left-handed shooters.

Item No.: 9084K

14 SIDE BLINKERS

To protect from scattered light, side blinkers which conform to the latest rules of the ISSF and DSB can be attached to the frames of the glasses.

Item No.: 9081

15 IRIS DISC, pivoting

The iris discs are screwed on to a titanium carrier. This reduces the weight considerably and improves wearing comfort.

ANSCHÜTZ AIR RIFLES

1 9003 Premium S2 Precise

- Action carrier designed using vibration analysis.
- Action carrier milled from high tensile aluminium blocks.
- Precise aluminium butt plate with individual adjustment options.
- Consecutive scale markings prevent changes to the settings.
- Maintenance-free stabilizer and dry firing device.

Includes: Precise aluminium butt plate, sights 6834, raiser block, cover caps for cheek piece and butt plate adjustment, plastic rifle case and accessory box.

Item No.: 011402 (Hand grip size L)
Item No.: 011384 (Hand grip size M)

2 8002 S2 Compressed Air Aluminium PRO-Grip

The match compressed air rifle which meets all modern requirements of today's competition air rifles and the latest state of technology:

- The barreled action is embedded into the action carrier via vibration absorbing elastomers so that vibrations which occur in the barreled action of the air rifle during shooting are effectively absorbed.
- Maintenance-free stabilizer.
- The newly developed trigger unit offers a constantly reliable trigger service even during fluctuations in temperature.
- The dry firing mode can only be changed in the cocked condition; it is therefore not possible to un-cock the action by pushing the dry firing switch once the trigger has been released. Unintentional firing is thus prevented.
- Hand grip, cheek piece and for-end are made of PRO-Grip® material.

Includes: sights 6834, raiser block, barrel weight and sliding weights, plastic rifle case and accessories box.

Item No.: 009259 (Hand grip size L)
Item No.: 009255 (Hand grip size M)
Item No.: 011357 (Left hand version, hand grip size L)

3 8002 S2 SOFT-Grip BLACK AIR

- Anatomically perfect stocks with vibration absorbing elastomers.
- Equiped with the new ANSCHÜTZ SOFT-Grip Coating.
- Easy-care.
- Multiply adjustable aluminum butt plate and cheek piece adjustment.

Includes: Sight set 6834, accessory box with filling adapter, air release screw, special grease 4425, Allen key, safety discs, o-rings, barrel weight, manual with original test target.

Item No.: 012956

4 8001 Compressed Air CLUB Walnut

- Walnut stock right/left hand.
- The cheek piece can be continuously adjusted in height and the butt plate can be continuously adjusted in length on unthreaded steel pillars.
- Cocking lever can be fitted to the left or right.

Includes: sights 6834, rubber butt plate 4709A, barrel weight and accessories box.

Item No.: 009165

ANSCHÜTZ SMALL BORE RIFLES, cal. .22 l.r.

5 1903 Natural Walnut

- Classic small bore beginner's rifle.
- Robust, durable, precise and consequently suitable as a club rifle.
- Available as a right or left handed rifle.
- Anatomically perfect walnut stock.
- Cheek piece individually adjustable by means of spacers.
- Butt plate adjustable in height and length.

Includes: Hand stop 6226, screwdriver, Allen key, user manual and original test fire group. (For sights, see accessories.)

Item No.: 000271

6 1913 in 1918 Alu Precise Stock

- Further development of the successful Match 54 barrelled action.
- Preferred model of small-bore shooters worldwide.
- Individually finely adjustable 5018 match trigger.
- Shortest lock time.
- Extremely smooth-moving bolt.
- Heavy target barrel, length: 660 mm

Includes: Plastic rifle case, hand stop 6226, for-end raiser block, screwdriver, Allen key, user manual and original test fire group. (For sights, see accessories.)

3 STEYR Biathlon Air Rifle

- The STEYR LGB 1 air rifle is the ideal training weapon for all biathletes and also the perfect competition weapon for junior and summer biathlon. Thanks to its individually adjustable stock and engineering perfected to the last detail the LGB 1 impresses with the greatest functional safety in summer or winter conditions.
- Quality barrel by ANSCHÜTZ.
- Sighting device with snow cover for insert holder and rear sight.
- Grooved receiver for hand stop and target sling.
- Carrier for 8 magazines.

Item No.: LGB1
Item No.: LGB1L (left hand version)

3

4 Morini CM 22 M

- The standard pistol is available in steel.
- The trigger unit is implemented in aluminium.
- The linear introduction of the cartridge from the magazine into the chamber, results in a more favourable angle to the magazine and thus more room for a longer barrel.
- Adjustable buffer system for the purpose of matching to cartridge power.
- The hammer spring can be adjusted to individual requirements.
- Sighting device fully adjustable in height and width
- Easily dismantled: One screw for the handle and another for the action.
- The pistol has no plastic parts.
- Anatomically shaped Morini handle with adjustable hand rest available in various sizes for right or left-handed shooters.
- Standard insert width: 4,0 mm
- Special accessories: alternative inserts of 3,5 mm and 4,5 mm also available.
- Delivered in hard shell case, incl. accessories.

Item No.: CM22M (Weight: 1210 g)
Item No.: CM-22RF-A (Weight: 750 g)
Item No.: CM-22RF Trigger unit made of steel (Weight: 940 g)

5 Morini CM 84 E

- Electronic, ball & socket mounted, maintenance-free and absolutely dry precision trigger.
- Supplied with three trigger springs. Fitted: 22–160 g. Enclosed: 0–22 g and 160–300 g.
- A light barrier on the trigger secures against the unintentional firing of a shot.
- Stable firing position and perfect results due to the extremely low vibration precision barrel, designed as a direct extension to the wrist by Lothar Walther.
- Morini glove grip in high quality walnut wood.
- The adjustable handles are available in various sizes for right and left-handed shooters.
- Rear sight continuously adjustable in width to suit the individual.
- Standard insert: 5,0 mm
- Special accessories: alternative inserts of 3,5–4,0–4,5–5,5 6,0 mm
- Supplied in an elegant hard-shell case, including tools and cleaning rod

Item No.: CM84E (with single stage trigger)
Item No.: CM84E-TS (with two stage trigger)
Item No.: CM84E-Light (with single stage trigger, Weight 1175 g)

6 Morini CM 162 EI

- Temperature-independent compressed air is used as the propellant.
- Detachable, exchangeable cylinder with built-in pressure gauge.
- Compressed air reserve 200 bar, sufficient for approx. 180 shots (per cylinder).
- When the charging pressure falls, the cocking lever is disabled by a latching hook.
- Electronic, maintenance-free, absolutely dry precision trigger, adjustable from 300–700 g, max. 1000 g (first stage from 50–300 g).
- Battery sufficient for more than 15,000 shots, with switch for battery conservation, indicator light for battery state.
- Dry firing possible without any problems.
- Anatomically shaped Morini walnut handle with adjustable hand rest available in various sizes for right or left-handed shooters.
- Consistent discharge ballistics due to built-in compensator.
- Rear sight adjustable in height and width.
- Standard insert width is 5,0 mm.
- Special accessories: alternative inserts of 3,5–4,0–4,5–5,5 6,0 mm

Supplied in hard-shell case with tools and brass filling adapter, and also two compressed air cylinders, both fitted with pressure gauges.

Item No.: CM162EI

Morini CM 162 EI (short)

Same design and features as the well-known CM-162EI model, but with a short barrel and weight only 970 g. Compressed air supply 200 bar, sufficient for approx. 150 shots (per cylinder), sights moved closer to the wrist.
Item No.: CM162EI-SHORT (not shown)

7 Morini CM 162 MI

Same design and equipment as the CM162 EI model, but with a mechanical trigger system.

Item No.: CM162MI

8 Morini Weights

(A) Cylinder weight, 60g for Models CM-162MI and EI
Item No.: CM-106

(B) Cylinder weight, 80g for Models CM-162MI and EI
Item No.: CM-107

(C) Barrel weight carrier, 60 g including 4 x 5 g weights for Models CM-162MI and EI
Item No.: CM-105

(D) **Barrel slide weight set with 4 x 5g weights**
Item No.: CM-108Item No.: CM-108

9 Morini Handle Modelling Paste

Item No.: CM400 (Can 125 ml)
Item No.: CM401 (Can 400 ml)

ahg F27A

1 aahg F27A Precise

This highly accurate small-bore target rifle with straight pull action has been developed as a result of close cooperation with experienced target shooters and the knowledge resulting from it.

The use of high quality materials, combined with solid and tried and tested technology, provides the precision required, not only by top class shooters, to be successful. Biathletes worldwide already value the reliability, precision and the operating convenience of the straight pull action during the loading procedure.

The centralised locking mechanism of the straight pull action with the receiver offer optimum absorption of the forces created at shot release.

Milled from solid, high tensile aluminium, this stock has a very slim fore-end with large radii and is suitable for all hand sizes.

he wedge shape of the longitudinal axis of the stock was calculated using complex analysis programs. Consequently, optimum vibration behaviour, stability and shooting precision have been achieved.

Multifunctional, stable and variable cheek piece notch adjustment with especially large adjusting range and precise adjustment of height and lateral settings allows an optimum adaptation/ correction to the shooting position. The cheek piece can be adjusted in two different ranges.

Includes:
F27A in Precise aluminium stock, with for-end raiser block and ahg Integral 6229 hand stop, without sights.
Item No.: F27A-660-Precise
Item No.: F27A-690-Precise

8 LP 10

A stabilizer with very high density eliminates recoil. Consistent shot for shot, without any readjustment, independent of the bullet weight.

First stage pull and second stage pull, first stage travel and trigger stop – the STEYR trigger system, which has been proven a thousand times over, offers you all the options for continuous adjustment to your own trigger technique.

There is also an optimum sighting line for you – depending on your skill and how strong your nerves are, you can set it continuously between 316 and 365 mm. Likewise you can set the width (up to 5 mm) and depth of the rear sight notch continuously and entirely to your habits.

Adjusting, pivoting in all directions – just so that the feel of the weapon fits you perfectly. You no longer need to carve out, bend or otherwise finish it yourself - the STEYR handle piece fits your hand perfectly!

Item No.: LP 10

5 Steyr Challenge E

The unique STEYR CHALLENGE is indeed a major challenger to the best air rifles in the world. Equipped with an electronic trigger and multifunctional adjustments the rifle can be made to fit the shooter perfectly. It represents the new generation of the STEYR LG 110.

The original STEYR LG110 match air rifle was used by Thomas Farnik to create a new World Record in the Olympic Final.

(R)evolutionary air rifle technology:

- Patented STEYR Stabilizer provides absolutely no recoil while shooting.
- Individually adjustable stock for the needs of each shooter.
- Fore-end adjustable in length, height and swivel-mounted.
- No movement at the trigger take up
- Redesigned loading area for better access
- External velocity adjustment
- CONNECT: quick take down buttstock for comfortable transport!

Item No.: Steyr Challenge E

6 LP 2

Nickel plated barrels, anodised aluminium surfaces and legendary precision make the LP 2 the ideal match pistol! The best materials and the most modern manufacturing techniques symbiotically combined. Even the trigger system and the grip are to the highest STEYR competition level!

The LP 2 dispenses with the barrel unit, barrel bore and stabiliser, but still has all the features that make a competitive competition pistol. With the loading pin system it is easy to operate and it can be optimally adjusted to the shooter: modifiable sighting line, specially designed barrel weights which, as with all STEYR air pistols, lie on the axis of the barrel.

Item No.: LP 2

7 LP 50

The 5 shot STEYR LP 5 has had a long and outstanding career. Now STEYR have developed the LP 5 into the LP 50. This pistol became even smoother and ensures the stability of an ideal competition weapon in any air pistol discipline. Being a great 5 shot weapon for the training of any dynamic pistol disciplines, the LP 50 is even more useful!

- Standard trigger adjustable from 450 g to 1.050 g.
- Three barrel vents steady the weapon additionally when shot is released.
- Maximum safety: shots only possible with magazine inserted.
- Infinitely adjustable length of sight from 307 to 350 mm
- Eight different grips available.
- Compressed air cylinders with German WIKA quality pressure gauge.

Item No.: LP50

LP 10 E

- Non-wearing training trigger.
- Optimum control of the pistol during firing, as the trigger pressure on the finger is maintained.
- Newly developed compensator with 8 channels to absorb turbulence in front of the muzzle.
- More finger freedom due to enlarged casing.
- Handle setting maintained by flexible electronics.
- Unrestricted adjustment possibilities within the 500 g trigger weight.
- Capacity 35,000 shots (2 standard 1.5 V AAA batteries)..

Item No.: LP 10 E (no illustration)

ANSCHÜTZ ACCESSORIES

1 ANSCHÜTZ Sight Set 7020
Complete sight set with front sight 6832, universal rear sight 7002 and metal insert set. Suitable for all current target rifles.
Item No.: 000937 (10-clicks)
Item No.: 000938 (20-clicks)
Item No.: 000940 (20-clicks, left hand version)

2 ANSCHÜTZ Sight Set 6834
Complete sight set with front sight 6832, universal rear sight 6805 and metal insert set. Suitable for all current target rifles.

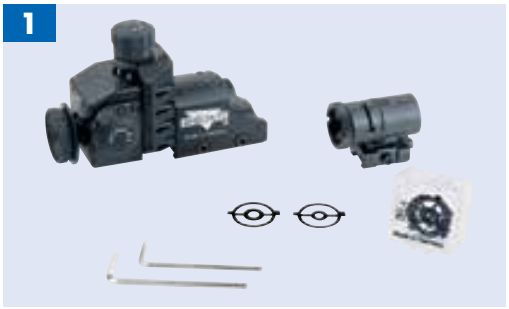
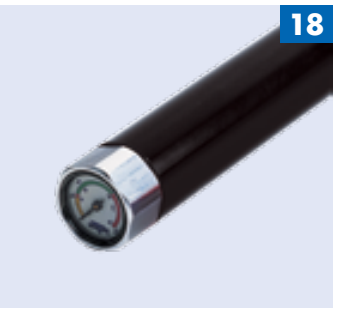
14 RING WEIGHT
Weight: 25 g. Inside diameter 12 mm.
Item No.: 001565

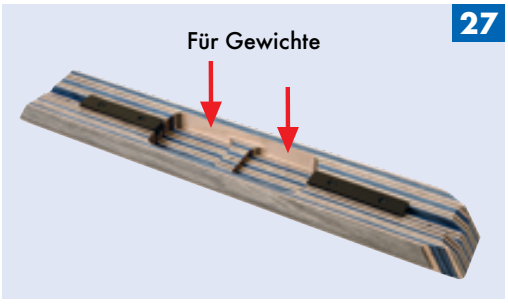
15 BARREL WEIGHT 4750
Weight: 68 g. Inside diameter 20 mm.
Item No.: 007293 (Weight, only)
Item No.: 007806 (Screw, only)

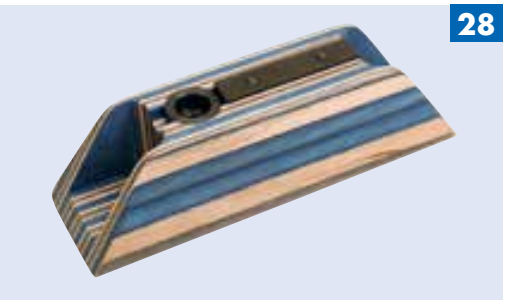


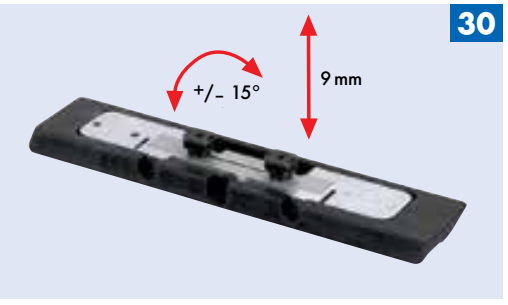
16 Adapter 4980
adapter to mount round Anschütz actions into square Anschütz stocks .
Item No.: 001146

17 Compressed air cylinder
aluminum with manometer, 410 g (empty), 450 g (full), 43 cm long.
Item No.: 013359 Silver
Item No.: 013358 Blue
Item No.: 013357 JUNIOR silver, 310 g (empty), 335 g (full), 29 cm long.









18 Compressed air cylinder
steel, with manometer, 875 g (empty), 925 g (full), 43 cm long.
Item No.: 013359 black

19 AIR RELEASE SCREW
- For emptying the compressed air cylinder.
- Suitable for ANSCHÜTZ compressed air rifles.

Item No.: 001520

20 Refilling Adapter
- Adapter with compressed air blow-off screw and air filter for refilling bottle.
- Suitable for ANSCHÜTZ compressed air rifles.

Item No.: 001521

21 HAND STOP with Sling Swivel 4751
Individually adjustable.
Item No.: 001131

22 HAND STOP with Sling Swivel 4752
Item No.: 001132

23 BIPOD 4770
Item No.: 001098

24 RAISER BLOCK 6713/2
- for Match products with screwed-on V-block.
- For Models 1407–1813.

Item No.: 009161

25 RAISER BLOCK 6817
- Extremely sturdy clamping strips guarantee 100% fit and are also suitable for large bore rifles.
- For V-block slot 11 to 13 mm.
- Suitable for ANSCHÜTZ models from Series 1913.

Item No.: 001064

26 VSIGHTING LINE EXTENSION
An optimum combination of sighting line extension and raiser block, specially developed for bench rest shooting. The benchrest shooter looks through the sight set in a completely different way. Due to the displacement to the rear and upwards, it is possible to adapt to the different shooting positions without compromise. 200 mm For Models 1407–1813.
Item No.: 008551 (1407-1813)
Item No.: 007065 (1907-2013)

27 Fore-end Raiser Block 2213-8550
24 mm high, 315 mm long, natural/blue.
Item No.: 008683

28 Vorderschafterhöhung 2213-8500
47 mm hoch, 170 mm lang, natur/blau.
Item No.: 008692

29 Fore-end Raiser Block 4856
Height: 22 mm (direct mounting) or 32 mm (with swivel rail). Can be extended in height in 10 mm steps by using several rails. Supplied with one swivel rail.
Length: 175 mm, Width: 50 mm
Item No.: 001140

30 VFore-end 4860
PRO-Grip, adjustable, 20 mm high and 248 mm long.
Item No.: 007957

31 Fore-end Raiser Block 4852/1
Black, height 38 mm
Item No.: 001139

ANSCHÜTZ ACCESSORIES

1 BUTT PLATE CARRIER 2213-8300
With tilting pillar guide for small-bore aluminum stocks.
Item No.: 001114

Item No.: 011794 right
Item No.: 011795 left

30 Precise Trigger Guard
For air rifle and small-bore.
Item No.: 011408

HUNTING ACCESSORIES

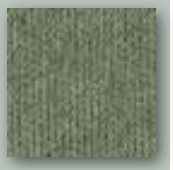
MICROTEX

The ahg functional underwear for highly active hunting

Ideal for physical hunting activities such as, e.g. mountain hunting, battue and beat work. Functional and thermal underwear made from double layered Tactel Aquator.

In contrast to purely natural fibres this underclothing is based on a double layered knitted fabric. The inner Tactel microfibres facing the skin transport moisture away from the skin. When the moisture reaches the outer layer of cotton, it is distributed over a large surface area. Rapid evaporation can thus take place.

Microtex keeps the skin dry and thus prevents drenching and cooling of the skin.



Properties:
- Moisture-regulating.
- Breathable.
- Temperature-regulating.
- Kind to the skin.
- Dimensionally stable but elastic.
- Easy care.

Material: 35 % polyamide, 65 % cotton

4 Balaclava
Item No.: 10120

5 Thermo-collar
Item No.: 10121

ALASKA

The ahg functional underwear for hide hunting

Ideal for long hide hunts in the bitter cold. Functional underwear made from synthetic fibres.

Alaska combines pleasant warmth with first class wearing comfort. In contrast to pure natural fibres, acrylic does not store body moisture in the fibres and thus provides comforting warmth over the whole body. Problem areas such as, e.g., joints, remain soothingly warm, even in very low temperatures.

Alaska is thus the ideal underwear for the cold seasons.

Properties:
- Extremely heat insulating.
- Kind to the skin.
- Keeps its shape.
- Non-iron.
- Anti-rheumatic.
- Highly elastic.
- Easy care.

Material: 100 % polyacrylic

6 Shirt

12 Big Mouth Little Sure Shot Gun Rest

The Little Sure Shot Gun Rests™ are versatile. Use them in any situation where stability and accuracy are important. They are equally effective in standing, sitting or kneeling shooting positions. The Little Sure Shot Gun Rests™ performs in the field and on the range with hand guns, rifles and shot guns.

- No need to carry a stick, attaches to virtually anything available
- World's Smallest, Most Versatile Gun Rests
- Dramatically increases accuracy by up to 50%

Item No.: 465-G (green)
Item No.: 465-O (orange)

7 Hunting glove NO WIND PRO

for the utmost demands, made from Pittards carbon fibre / leather with digital embossing. Water repellent. Upper hand made of No Wind Pro-Fleece prevents cooling due to the wind.

Sizes: 7,5 – 10,5

Material: 45 % leather, 55 % Polaire polyester

Item No.: 10001

8 ANSCHÜTZ ceramic coating

ANSCHÜTZ Keramik Coat is a heavy-duty ceramic coating for all types of firearms and knives. Despite its excellent lubricating properties, ANSCHÜTZ Keramik Coat is residue free; it forms an invisible film on the weapon. Provides long term protection from corrosion. ANSCHÜTZ Keramik Coat works on metal and plastic right from the first treatment – even with older firearms.

- Residue-free, non-greasy coating.
- Prevents dust from accumulating.
- Long lasting effect.
- Economical in use.
- Salt and fresh water resistant.
- High temperature resistant from 40 °C to +750 °C.
- Cleaning of the firearm is made easy.

9 Microfiber towel

This anti-bacterial, extremely absorbent and quick drying microfiber towel (40 x 40 cm) is supplied in a pouch with a durable front and full net back so that it always remains dry due to air circulation and is constantly ready for use. The pouch has a snap hook and can thus be fastened anywhere, your backpack, hunting bag, fishing vest or even your belt loop..

- Eliminates 99.9% of all bacteria and fungi, including mildew.
- Perfect for cleaning high quality glass such as binoculars or telescopic sights.
- Safely clean and wipe electronic screens at home or in the office.
- Has a deodorizing action.
- FITI and ECO-TEX tested.
- Machine washable.
- Can be safely and easily attached almost anywhere.

Material:
Microfiber towel: 85% polyester, 15% nylon
Pouch: 100% nylon
Snap hook: Aluminum

Item No.: 70100

10 Shooters' SERVICE BOX

- Storage space for all cleaning utensils.
- Clear organisation of all the parts stored within.
- Removable base.
- Rubberized, plug-in rifle holder.

Size: 56 x 36 x 29 cm

Item No.: 537

11 Aluminium buffer cartridges (2 pcs.)

- Gentle uncocking of the weapon.
- Danger-free dry firing.
- Safe storage.
- Exact ammunition dimensions.

Item No.: 1313 (Cal. .308 Win)
Item No.: 1314 (Cal. 8 x 57 IS)

1 Sidewinder 30 Tactical SF 8.5-25x42

The Hawke Sidewinder encompasses a high quality optical system with Fully Multi-Coated glass. This in turn provides sharp, bright and high resolution viewing in all light conditions.

Key Features:
- Dual colour Red / Green reticle illumination
- 2" Large side wheel
- Coil erector spring provides stability during recoil
- 30 mm mono-tube withstands the heaviest recoil
- Locking ¼ M.O.A target style turrets
- Fully multi-coated optics

Additional Features:
- Locking Fast-Focus ocular adjustment
- Screw-in lens covers to protect your investment
- Waterproof, Shockproof and Fog Proof
- All firearm caliber rated
- Hawke Worldwide Warranty

Delivery volume:
Hard travel case, 2 in Side Wheel, Sun Shade, CR2032 Lithium Battery, Pointer, Screw-in Lens Caps, Lens Cloth, Allen Keys, Instruction Booklet

Item No.: HK4030

2 Endurance 30 3-12x56

The Endurance 30 family of scopes makes its return, with a focus on long range hunting and shooting.

Key Features:
- 30mm Mono-tube design - handles heavy recoil
- Glass etched Red Illuminated LR Dot Reticle
- Infinitely adjustable stepless side rheostat
- Coil erector spring – no shift in zero
- Fast focus ocular – set the diopter in seconds
- ¼ M.O.A. positive click low profile fingertip turrets

Additional Features:
- Tactile high performance rubber grip zoom
- Sunshade compatible – all models supplied with sunshade
- Waterproof, Shock proof – all caliber rated
- Nitrogen purged - fog proof, for use in all conditions
- Transferrable Hawke Worldwide Warranty

Delivery volume:
Hard travel case, CR2032 Lithium Battery, Screw-in Lens Caps, Lens Cloth, Allen Keys, Instruction Booklet

Item No.: HK6415

3 Reach Forward Mount

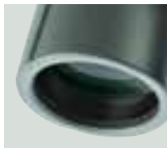
Precision machined out of high quality aluminium, reach forward mounts offer greater flexibility when mounting riflescopes with wide saddles or oversized side-wheels. Reach forward mounts can also be useful when mounting scopes with very long or very short eye relief.

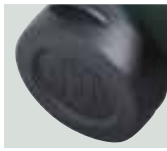
Key Features:
- Internal cushion tape (prevents scope damage)
- 2" Reach Forward configuration
- 1" Scope Tube
- Reversible dovetail clamp: 3/8" or 11mm Rail
- Double Hex screws

4 Match-Mounts

A stylish scope mounting solution. Enhances the look of your favourite rifle and scope.

Key Features:
- Internal cushion tape (prevents scope damage)
- Double hex screws
- Precision machined out of high quality aluminium





5 Fernglas Endurance ED

Phase corrected prisms offer a crisp, clear and bright high resolution image.Designed to impress with exceptional viewing performance producing sharp ‚Close Focus' images from as close as 2 m

- High quality optics "Phase Corrected" lenses
- Textured "high grip" rubber
- High quality carry case with detachable neck strap
- Water and fog proof
- Padded neck strap
- Hawke® Worldwide warranty

Delivery volume:
Carry Case, Padded Neck Strap, Lens Cloth, Lens Caps, Stay-on Objective Lens Caps, Instruction Booklet

Item No.: HA3944 (8 x 42, black)
Item No.: HA3949 (10 x 42, green)

6 Nature-Trek

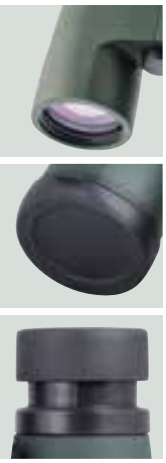
Inner focus optical design produces stunning optics and detail.

Effortless focusing and impressive depth of field makes these binoculars quick and easy to use.

- Fully multi-coated lenses for maximum clarity
- BAK 4 roof prism design to be compact
- präzise Scharfstellung und Dioptrienausgleich
- Lightweight, durable polycarbonate body for lifelong durability
- Close focus from 6.6"-8.2"
- Carry case with adjustable neck strap
- Stay-on objective lens covers
- Waterproof and Fog Proof
- Hawke® Worldwide Warranty

Delivery volume:
Carry Case, Padded Neck Strap, Lens Cloth, Lens Caps, Stay-on Objective Lens Caps, Instruction Booklet

Item No.: HA3922 (8 x 42, green)



6

7 Endurance ED

The finest optical quality. High resolution low chromatic aberration viewing. ED glass in conjunction with Dielectric prism coatings and Fully Multi-Coated optics produce stunning image quality.

- ED Optical system for edge to edge clarity
- Intense color reproduction
- Dielectric coated prisms
- High stability magnesium alloy body for maximum durability
- Fully multi-coated optics to enhance image quality
- Supplied with zoom eye piece (fixed wide angle available)
- Digi-scope compatible for use with your camera
- Adjustable body rotation for viewing in virtually any position
- Fully waterproof
- Twist-up eye cup for proper, stable eye relief
- Dual focus knob to achieve crisp focus
- Stay-on soft scope cover for maximum protection
- Hawke® Worldwide Warranty

Delivery volume:
Carry Case, Lens Cloth and Lens Caps

Item No.: HT3805

7

8 Laser Range Finder: Professional

Highly accurate multi-mode professional Laser Range Finder. Range finding capabilities include: Distance (straight and beeline), height, height difference and angle of projection.

- 6X Magnification
- Water resistant
- Inner-vision-field LCD display
- Range: 5m - 600 m
- Easy 2 Button Operation
- Uses a single CR2 3V Battery
- Neoprene Carry Case (with Belt Loop)
- Lanyard with battery compartment ‚key'
- Field of View: 122 m@1000 m
- Field of View angle: 7°
- Angle Range: +90°
- Hawke® Worldwide warranty

Delivery volume: Carry Case, Wrist Strap, Lens Cloth, CR2 Batterie and instruction.

Item No.: RF7600

8

9 Red Dot Sights

Red illuminated 5 M.O.A Dot with 11 brightness settings. Quick target acquisition, fixed focus & unlimited eye relief. Simply Point & Shoot.

- Unlimited eye relief
- 25 layer multi-coated optics
- Designed for quick target acquisition
- Fixed focus enables use on pistols, shotguns and bows
- Waterproof, shockproof and fog proof
- Hawke® 1yr warranty

Item No.: HK3205 (9-11 mm rail)
Item No.: HK3206 (Weaver rail)

- and many other 12V applications

Lighter. Smaller. Better.
Just ¼ of the weight of a traditional sealed lead acid batteries. Our 12V Lithium Polymer battery packs will easily fit in a coat pocket or clip to your belt. Gone are the days of carrying heavy lead-acid batteries. You won't believe the difference!

Flat Discharge - Brighter for longer
Lithium polymer technology gives a very flat discharge curve which means sustained power to the end of the cycle. If you are powering lights they will remain brighter for longer, giving you sustained performance.

Built in Fuel Gauge
With the built in Tracer fuel gauge you can check the power level remaining in the battery. A touch of the button shows how much energy remains and whether you need to recharge.

High Efficiency Smart Charger
The compact 1.6A Smart Charger (included) will charge your battery quickly. A rapid 3A charger is available as an optional upgrade.

Universal Connections Available
Tracer battery packs can power any 12V application. As standard we provide connectors to supply Tracer lighting products and also a 12V cigar socket adapter. (Ideal for mobile phone car chargers or portable DVDs).
In addition we can provide any connection on a bespoke basis. Just call us and ask.

Protection
The battery pack is protected against over charge and discharge, there is also short circuit protection.

Certified Safe
All Tracer lithium batteries conform to standard UN 38.3 which is the ONLY relevant safety standard for lithium batteries. Our battery packs have been through a rigorous testing procedure by UN certified inspectors. You should NEVER handle a non-certified lithium battery pack.

We offer a range of batteries that have a nominal 12V rating from 4Ah to 22Ah in 5 sizes. This chemical construction produces a battery that is the most compact and lightest available. A five LED fuel gauge keeps the user informed of the battery charge state.

They are most suitable for portable solutions such as powering high power lights, but we supply batteries for many other applications such as security, photography, smart phone charging etc. Maximum continuous current is 10A for all models except the 4Ah & 8Ah versions which will deliver 4A & 8A continuous current respectively. Each battery is supplied with an AC mains charger and a 12V vehicle charger.

An internal battery management system (BMS) provides protection in use. All batteries are CE approved and tested to EN38.3 which is the standard for transportation. The batteries are guaranteed for 12 months and will typically give 300 cycles in normal use.

Delivery volume:
Canvas Carry Pack, 12V Light Adaptor Lead, AC Mains Charger and DC Vehicle Charger.

Item No.: BP2548 (22 Ah)
Item No.: BP2544 (8 Ah)

Kustermann

Das Schützen-Outfit der Weltmeister und Olympiasieger

We have been the world wide guarantee for your success for more than 25 years

Of course, shooting sportswear is not everything in shooting sport.
But everything is nothing without clothes that fit and stabilise.
A long time before I won the European and World Championships in Crossbow, Small Caliber and Air Rifle shooting for the first time (with a new world record), the importance of well fitting jackets and trousers had become clear to me.

Today, many years later, I make use of all my experience in developing modern shooting sportswear. The national and international successes achieved for many years with the aid of our equipment speak for themselves.

Please see for yourselves, as did Katerina and Matt Emmons, multiple medalwinners during Olympics 2004, 2008 and 2014, and many successful marksmen and markswoman all over the world.
Make your choice from a large range of many and diverse jackets, trousers, shoes, gloves and accessories. You will be taken by the wide selection and first class service we offer you not only in the area of ready-made sportswear, but especially in the tailor-made clothing area. In this field we are a world wide leader with respect to fit and quality. We are proud of that!

We wish you great success with your Kustermann clothing which we would like to develop and design for you and harmonize according to your personal wishes. We will always be ready to listen to your suggestions and preferences.

We would like to inform you that after careful consideration we have decided to distribute all products of the Kustermann GmbH in the future through ahg-Anschütz Handels GmbH.

We are convinced that we have found a competent partner who has been active in our shooting business for decades and who is in the position to ensure the high quality standard of the Kustermann products in the future.

Have a lot of fun browsing through this catalogue!
Your Kustermann team.

2 Shooting jacket MONACO SUBRATEX

Kustermann MONACO SUBRATEX is basically the same make as our successful model MONACO "Comfort", except that for this jacket we use a newly developed synthetic fibre instead of the usual canvas. This being a technical fibre, it has the following characteristics:

- actively respiring
- non-tear fabric
- pervious
- washable
- thermo-fixed

Which do not change the wearing comfort during light- and temperature fluctuations. In order to benefit fully from the effect of this material, the lining is also made from this type of tissue and only in very few spots cotton is used.

Colour Combination:
black/grey - or to your desire.

Material:
85% Polyester tissue, 15% cotton
10% cotton, 5% leather
Lining: 60% Polyester tissue, 40% cotton

Item No.: 99149

LONDON

1 Shooting jacket LONDON

The new Kustermann shooting jacket LONDON has the same original cut which has been used successfully for years. This guarantees that an optimal fitting is given in all positions. The material mix of Velon, Subratex, leather and canvas provides best possible stability in relaxed position. Top grip sheets on elbow and shoulders offer best grip. Leather shoulder straps present comfortable wearing while in position and allow controlled creasing for best fit of the butt plate in prone position.

Colour combination:
grey / black / blue / white

Material:
40% leather, 25% canvas, 23% polyester tissue, 12% Velon-cotton/ PES combined with PUR

Lining:
78% cotton, 22% polyester tissue

Item No.: 99120

2 Shooting pants MODELL 1

These double canvas trousers are absolute Top Quality! The leather waist-band and fastener bring about more comfort and considerably higher durability. There is a 2-way zip on the rear-side of each leg. Top grip panels on both knees and on the seat provide a secure „kneeling" position. The strong innerlining ensures best holding ability. The patented, adjustable screw-in button trouser fastener KUSTERMANN enables individual adjustments (no pressure spots in prone position). These shooting trousers were designed by us in detail according to the needs of World champions and Olympic winners.

Colour combination:
black – or upon your request
Material:
95% cotton, 5% leather
Lining: 100% cotton

Item No.: 99220

3 Shooting pants MONACO

There is nothing better! If you rate durability and stability very highly then we recommed you try our MONACO Model. Smooth cow-hide leather on the front-side guarantees utmost wearing comfort. The rear-side of the trousers is made of special MONACO double canvas (extra hard) and provides therefore optimum stability in standing position. The strong inner-lining ensures the best holding ability. The 2-way zip allows a comfortable kneeling position. Seat and knee parts are padded with the maximum sized top-grip panel. The patented, adjustable screw-in-button trouser fastener KUSTERMANN ensures for individual adjustment (no pressure spots in prone position).

Colour combination:
front blue cow-hide leather, back white MONACO canvas or upon your request

Material:
50% leather, 50% cotton
Lining: 100% cotton

Item No.: 99210

SHOOTING BOOTS

1 Shooting boot Model KUSTERMANN

The Kustermann Shooting boot has all of its predecessor's main features what makes a boot more comfortable and steady.

- The whole boot is made of smooth leather, to achieve an even greater stability.
- The new boot lace stoppers allow an even more precise lacing in the lower heel area.
- The reliable 4-zone lacing for optimal position of the toes, instep, lower heel, calf and shinbone.
- Comfortable, tight lacing prevents pressure in kneeling position and adjusts immediately to any foot form.
- Double-pull Velcro fastener around the Achilles heel for individual adjustment of the boot to the foot.
- Finest finish in the outer and inner boot areas.
- Well padded tongues made of perforated material avoid pressure and guarantee perfect air circulation.
- Toe- and heel-cap are made of extremely stiff thermo-plastic material.
- The shoe complies to the new ISSF rule 2013.

Colour combination: red/grey/black
Material: 100% leather
Sole: India rubber
Sizes: 36–48 (EU) / 3½–13

Item No.: 99300

SHOOTING GLOVES

The professional shooting gloves are a completely new concept and unique in their field. The innovative high-tech materials provide fully new wearing properties. The gloves protect your hands from sweating in summer or freezing in winter. Thanks to the new windstopper, cold can no longer reach your hands. The gloves can be washed and are therefore absolutely hygienic.This new high-tech product will be also produced in a special women and men model.

2 Shooting glove

The supporting glove allows you a previously unknown direct contact to the weapon. Each small correction is directly transferred to the weapon. The same applies to information which the weapon gives the shooter. When shooting in prone position, shooters have reported that their fingers no longer go numb.

Material: 60% leather, 40% polyester
Padding: 100% nylon

The sizing of the women model is XXS – L (size 6 – 8)
Item No.: 99481
The sizing of the men model is S – XXL (size 8 – 10)
Item No.: 99480

3 Shooting glove

The glove for the trigger hand prevents your hand from slipping on the stock and still allows one-hundred percent feeling. No more sweaty hands or freezing fingers.

Material: 60% leather, 40% polyester

The sizing of the women model is XXS – M (size 6 – 7.5)
Item No.: 99471

The sizing of the men model is S – XXL (size 8 – 10)
Item No.: 99470

4 Shooting glove

Fingerless and shooting ergonomical top glove with innovative Top Grip panel.
